All-Weather Manual Pumps. Manual pumps should work in all seasons, as long as they have something called a "weep hole" installed. This simple hack is just a hole drilled into the PVC pipe below frost level. After you're done pumping, water will slowly leak out until it reaches equilibrium, ensuring that the pipe itself will never freeze solid.

Manual Water Pump For Deep

Use a quality deep well pump that has a sealed pump head. Deep well pumps never have to be primed. Don't use a pitcher pump for a well that supplies drinking water. They have an open top and can introduce harmful bacteria into your well. Spend the extra money for a good deep well pump. Andrew- Well Driller, Engineer, & Custom Machining.

[Hand Water Pump, Well Hand Water Pump By Bison Pumps](#)

There is no manual well pump for that depth. We used to have a deep well (about 300' into a 1000-yr aquifer) and we'd lose electricity all the time. I researched for years for a manual pump and never found one. The reason was always the same - the water is too heavy to raise it that far - which, BTW, may be why you have a 4" pipe.
