[Amazon.com: Deep Well Hand Pump](#)

There is no manual well pump for that depth. We used to have a deep well (about 300' into a 1000-yr aquifer) and we'd lose electricity all the time. I researched for years for a manual pump and never found one. The reason was always the same - the water is too heavy to raise it that far - which, BTW, may be why you have a 4" pipe.

Hand Water Pump, Well Hand Water Pump By Bison Pumps

Requires an area approximately 2m Ø for installation and is capable of manual pumping speeds up to 40 strokes per minute. Approximate discharge at 40 strokes per minute is around 900 litres per hour. The pump

is suitable for 100mm – 150mm Ø bore wells and recommended for water level setting depth of 20-45m.

There are two main design considerations that will drive the type of hand pump you need – deep well or shallow well. Deep well pumps are more expensive and can retrieve water from several hundred feet below ground. Shallow well pumps or cistern pumps are designed to draw from sources that are less than 20 feet below ground. Ease of Installation

Buying a water pump? The largest selection of water pumps ... All-Weather Manual Pumps. Manual pumps should work in all seasons, as long as they have something called a “weep hole” installed. This simple hack is just a hole drilled into the PVC pipe below frost level. After you ’ re done

pumping, water will slowly leak out until it reaches equilibrium, ensuring that the pipe itself will never freeze solid.
