**manual water
pump**
There is no
manual well pump

for that depth. We used to have a deep well (about 300' into a 1000-yr aquifer) and we'd lose electricity all the time. I researched for years for a manual pump and never found one. The reason was always the same - the water is too heavy to raise it that far - which, BTW, may be why you have a 4" pipe.

[Water pumps - Machine Mart](#)
All-Weather Manual Pumps. Manual pumps should work in all seasons, as long as they have something called a "weep hole" installed. This

simple hack is just a hole drilled into the PVC pipe below frost level. After you're done pumping, water will slowly leak out until it reaches equilibrium, ensuring that the pipe itself will never freeze solid.
