Underdogs, unite! Celebrated nonfiction author Melissa Stewart offers young readers a funny, informative look at some animal "underdogs" that have amazing means of survival. Pee-ew! Should the stinky, skunklike zorilla take a bath? And should the slowpoke Gala?pagos tortoise get a move on? Everyone knows "cool" animals like elephants and cheetahs, but you should meet these lesser-known creatures that have amazing, creative means of survival! Written with a lively, playful voice, this book introduces young readers to a variety of animal "underdogs" and explains how characteristics that might seem like weaknesses are critical for finding food and staying safe in an eat-or-be-eaten world. Along with her engaging animal facts, Stewart weaves in a gentle message of understanding and celebrating differences. Stephanie Laberis's bright, humorous, and scientifically accurate illustrations add to the fun.

Adobe's Lightroom has emerged as a must-have software due to its powerful editing tools and time saving organizational capabilities but how you establish a personalized, creative workflow that optimizes this technology, your time, and your art eludes most photographers. Jason Bradley, award-winning photographer and Lightroom pro, shares the answers to these questions in this practical and easy to follow guide that taps into the "how" and the "why" of a professional photographer's creative workflow in Lightroom. Bradley will show you how all workflows can be simplified into three steps: establishing, managing, and rendering the file, alongside stunning photographs and explanations from his own experiences. This book will not only teach you how to work within Lightroom but, ultimately, how to make Lightroom work for you.

This book is a reference grammar of Kulina, an Amazonian language spoken in Brazil and Peru. The dialect described by

the author is spoken on the upper Purus River in the Brazilian state of Acre. Kulina belongs to the Arawan language family. It is predominantly head-marking and has a complex verbal morphology which is largely agglutinating with some instances of fusion. The language has two noun classes and two genders. The gender agreement of transitive verbs with their arguments is in part governed by intricate grammatical rules and in part pragmatically driven. There are three types of possession, alienable, inalienable, and kinship. The latter category only applies to some kinship nouns, while others are alienably possessed. Kulina has aspirated and unaspirated obstruents, but different aspirated obstruents do not co-occur in one morpheme due to Grassmann's law, a dissimilation process known from Sanskrit and Ancient Greek. The book contains two Kulina texts and a chapter on the lexicon, which discusses colour terms, generic nouns for plants and animals, pet vocatives, idioms, and the origin of loan words.
