David Busch's Nikon Z7 II/Z6 II Guide to Digital Photography  
Genealogical Publishing Com  
Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military restructuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and

scholars of gender, security studies and American politics.

Textile production is one of the most important crafts in Aegean and Eastern Mediterranean Bronze Age societies and recent interdisciplinary and collaborative work offers crucial new perspectives into this field. The new and updated catalogue of archaeological textile finds presented here clearly demonstrates, even from the few extant finds, that knowledge of the use of fibers and of elaborate textile techniques that were used to produce textiles of different qualities was well developed. The functional analysis of spindle whorls and loom weights can be explored through experimental archaeology employing newly developed methodologies. The results bring new insights into the types of textile that may potentially have been made by such tools. This is highly pertinent as textile tools often constitute the single most important and plentiful type of evidence for the various stages of textile production in the archaeological record. The combination of experimental archaeology, analyses of

textile tools and find contexts allows for a discussion of the nature of textile production at different sites, regions and time periods. A collaboration between archaeologists specialized in their site and textile tool specialists has produced data sets of a large number of textile tools from several Bronze Age settlements, including Khania, Malia, Midea, Tiryns, Troia and Tel Kabri. The results of these analyses provide unique insights into both the production processes and, significantly, into the range of types of textiles that could have been produced at specific sites. These results illustrate the central, social and economic impact of textile production in the Aegean and Eastern Mediterranean Bronze Age societies.

Older than both ceramics and metallurgy, textile production is a technology which reveals much about prehistoric social and economic development. This book examines the archaeological evidence for textile production in Italy from the transition between the Bronze Age and Early Iron

Ages until the Roman expansion (1000-400 BCE), and sheds light on both the process of technological development and the emergence of large urban centres with specialised crafts. Margarita Gleba begins with an overview of the prehistoric Appennine peninsula, which featured cultures such as the Villanovans and the Etruscans, and was connected through colonisation and trade with the other parts of the Mediterranean. She then focuses on the textiles themselves: their appearance in written and iconographic sources, the fibres and dyes employed, how they were produced and what they were used for: we learn, for instance, of the linen used in sails and rigging on Etruscan ships, and of the complex looms needed to produce twill. Featuring a comprehensive analysis of textiles remains and textile tools from the period, the book recovers information about funerary ritual, the sexual differentiation of labour (the spinners and weavers were usually women) and the important role the exchange of luxury textiles played in the emergence of an elite. Textile production played a part in ancient Italian society's change from an egalitarian to an aristocratic social structure, and in the emergence of complex urban communities.

El Patologo. Parte I Schiffer Pub Limited

This book is designed to act as a readily accessible guide to different methods and techniques of use-wear and residue analysis and therefore includes a wide range of different and complementary essential topics: experimental tests, observation and record methods and techniques and the interpretation of a diversity of tool types and worked raw materials. The onset of use-wear studies was marked by the development of theory, method and techniques in order to infer prehistoric tools functionality and, therefore, understand human technological, social and cultural behavior. The last decade of functional studies, use-wear and residue analysis have been aimed at the observation, recording and interpretation of different activities and worked materials found on archaeological tools made on different types of organic and non-organic materials. This international group of contributions will be fundamental for all researchers and students of the discipline.

This book, by Alexander S. White, is a complete, clearly written guide to the operation of the Nikon Coolpix P900 digital camera. The book explains all shooting modes, menus, functions, and controls of this superzoom camera, accompanied by more than 350 full-color illustrations and sample photographs. The guide shows beginning and intermediate photographers how to use the camera's many options to get the results they want. The book explains topics such as autofocus, manual focus, HDR (High Dynamic Range) photography, ISO, memory cards, and flash modes. It includes a discussion of techniques for using the P900's phenomenal zoom lens, with a maximum optical focal length of 2000mm, to full advantage. The book also discusses the camera's

features for image transfer and remote control through the P900's built-in Wi-Fi network, as well as its features for adding location data to images. The book includes sample images taken with the creative settings of the camera, including the Picture Control options, which alter the color processing of images; the Scene and Special Effects shooting modes, with settings optimized for subjects such as landscapes, birds, pets, sunsets, and action shots; and the camera's features for burst shooting and time-lapse photography. In addition, the book provides introductions to topics such as infrared photography, street photography, and macro photography. The book also explains the video features of the P900, which can shoot HD video with stereo sound and can record high-speed video at rates up to 4 times normal speed. In addition, the book describes procedures for playing back images and videos in the camera and for using the Filter Effects option to add special effects to images after they have been captured. In three appendices, the book discusses accessories for the Coolpix P900, including cases, external flash units, and charging and power options. The appendices include a list of useful web sites and other resources, as well as a section with "quick tips" to help users take advantage of the camera's features in the most efficient ways possible.

the first time in a decade, The Art of the Start 2.0 is Guy Kawasaki's classic bestselling guide to launching and making your new product, service or idea a success. This new edition has been expanded to reflect the seismic changes in business over the last decade, in which once-invulnerable market leaders have struggled and many of the basics of getting established have become easier, cheaper and more democratic. Today, business plans are no longer necessary. Social media has replaced PR and advertising as the key method of promotion. Crowdfunding is now a viable alternative to investors. Cloud computing makes basic infrastructure affordable for almost any new venture. The Art of the Start 2.0 will show you how to effectively deploy all these new tools. And it will help you master the fundamental challenges that have not changed: building a strong team, creating an awesome product or service, and facing down your competition. Whether you're an aspiring entrepreneur, own a business, or want to get more entrepreneurial within any organisation, this book will help you make your crazy ideas stick. It's an adventure that's more art than science - the art of the start. 'The Art of the Start 2.0 is the ultimate entrepreneurship handbook. Kawasaki's generous wisdom, tips, and humour reflect his successes and failures. We can all benefit from his insights'

Arianna Huffington, president and editor in chief, Huffington Post 'A successful entrepreneur requires three things: a garage, an idea, and this book - Guy's irrepressible guide to the raw essentials of life in a young company' Michael Moritz, Sequoia Capital Guy Kawasaki is the chief evangelist of Canva (an online design service) and an executive fellow of the Haas School of Business at U.C. Berkeley. Previously, he was the chief evangelist of Apple and special adviser to the CEO of the Motorola business unit of Google.
