There have been major advances in technologies to support crisis response in the last few years. However, many aspects related to the efficient collection and integration of geo-information, applied semantics and situation awareness for disaster management are still open. To advance the systems and make them intelligent, an extensive collaboration is required between emergency responders, disaster managers, system designers and researchers. To facilitate this process the Geo-information for Disaster Management (Gi4DM) conference has been organized since 2005. Gi4DM is coordinated by the Joint Board of Geospatial Information Societies (JB GIS) and the ad-hoc Committee on Risk and Disaster Management. This volume presents the results of the Gi4DM 2012 conference, held in Enschede, the Netherlands, on 13-15

December . It contains a selection of around 30 scientific and 25 best-practice peer-reviewed papers. The 2012 Gi4DM focuses on the intelligent use of geo-information, semantics and situation awareness.

Globalisation has not led to the ‘ death of geography ’ . Intensified relations between communities in different parts of the world have only highlighted the need for understanding and managing phenomena on a variety of geographic scales. From global warming to credit crunch, and from epidemics to terrorism, causes and solutions are sought on local, regional, national as well as inter-continental levels. With the advent of Geospatial Technology, scholars, policymakers and entrepreneurs have

valuable tools in hand to proceed. This book offers the first systematic account of the science behind this mental and technological revolution. Tracing the adoption and dissemination of Geospatial Technology in a range of disciplines, it examines the impact this technology has had, and is likely to have, on the explanation of spatial behaviour, phenomena and processes. At the same time, stressing innovative usage, it explores scientific contributions to technology advancement.

This provocative, “critically important” memoir of working-class boyhood in rural Indiana offers a searing cultural analysis of toxic masculinity in American culture (NPR). As progressivism changes American society, and globalism shifts labor away from traditional manufacturing, the roles that have been prescribed to men since the Industrial Revolution have been rendered obsolete. Donald Trump's campaign successfully leveraged male

resentment and entitlement, and now, with Trump as president and the rise of the #MeToo movement, it's clear that our current definitions of masculinity are outdated and even dangerous. Deeply personal and thoroughly researched, the author of *The People Are Going to Rise Like the Waters Upon Your Shore* has turned his keen eye to our current crisis of masculinity using his upbringing in rural Indiana to examine the personal and societal dangers of the patriarchy. *The Man They Wanted Me to Be* examines how we teach boys what's expected of men in America, and the long-term effects of that socialization which include depression, shorter lives, misogyny, and suicide. Sexton turns his keen eye to the establishment of the racist patriarchal structure which has favored white men, and investigates the personal and societal dangers of such outdated definitions of manhood. “. . . exposes the true cost of toxic masculinity . . . and takes aim at the patriarchal structures in American society that continue to uphold an

outdated ideal of manhood. ” —Book Riot

Cataract surgery is one of the most frequently performed procedure in the United States, and cataracts are a leading cause of visual impairment in the world. Glaucoma is also a very common eye disease with an expected 3.3 million Americans afflicted with primary open angle glaucoma by 2020. The coexistence of these two diseases is not uncommon and management of a cataract can have significant impact on the glaucoma status of a patient. Cataract surgery textbooks may have one chapter dedicated to the management of cataract with coexistent glaucoma. Likewise, a

typical glaucoma surgical text dedicates one chapter to the management of these two diseases concurrently. This book will focus on the treatment of cataract in the setting of glaucoma, using an evidence-based medicine approach. Managing cataracts to the best advantage of the glaucoma should result in the best visual outcomes for patients. It should be a wonderful resource for general ophthalmologists and residents as well as glaucoma fellows.

Art historian James Hyman takes a fresh look at the crucial years after the Second World War when attempts were made to revive European culture and debates about the future of art were fierce. The author proposes that realism in Europe during the early Cold War years occupied a radical vanguard position and stood in opposition to the competing claims made for American Abstract Expressionism. He examines two distinct visions of realism - social

realism and Modernist realism - and explores their political implications and ideological significance. Hyman argues that this Battle for Realism shaped and internationalised British art and addresses a range of artists, from Modernist realists such as Auerbach, Bacon, Freud, Kossoff, Moore and Sutherland to social realists Hogarth, de Francia and the 'kitchen-sink painters'. He also illuminates the impact of foreign and emigre artists on British culture, addressing artists such as Giacometti, Guttuso and Picasso, and examining the claims made for London as an art centre to rival the Ecole de Paris and the New York School. Hyman draws on contemporary critical writing to give fresh insights into the art debates of the period and gives new prominence to the Man They Wanted Me to Be. Springer Science & Business Media

An anthological tour through Italy conducted by the Polaroid photographer. Maurizio Galimberti, known to everyone as the Polaroid photographer, is not merely a photographer but a photographer-painter in that he uses the medium to express himself, to convey emotions, allowing the pictures always to leave a door ajar for the imagination of those who see them. The Polaroid camera has accompanied Galimberti throughout his career. This book tells the story of a Grand Tour of Italy in over 300 images, a journey that Galimberti has made again recently, returning to the places dear to his heart and continuing and refining a line of research on which he embarked over twenty years ago. The very first photos that he took in the nineties have now been joined by previously unpublished ones from the last few years. The Complete Guide to Light & Lighting in

Langford's Advanced Photography is the only advanced photography guide a serious student or aspiring professional will ever need. In this eighth edition, Efthimia Bilissi continues in the footsteps of Michael Langford by combining an unrivalled level of technical detail with a straightforward writing style while simultaneously bringing the text firmly in to the digital era. This book covers the entire photographic process from a technical standpoint - not only detailing the 'how' but also explaining the 'why' that is so often missing from photography texts. From the workings of cameras, lenses, digital imaging sensors and software to new hot topics such as HDR imaging, digital asset management, and

even running your own photography business, everything a serious photographer could need to extend their art into professional realms is covered. The book also benefits from a full glossary, charts and inspirational full color images throughout, with summaries and projects at the end of each chapter to reinforce the theory.

The twelfth-century French poet Chr é tien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the

first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chr é tien ' s major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.
