Princeton University Press Architecture's growing intimacy with new types of art Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art—particularly

multimedia installations that take place in and on the surfaces of buildings—and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design.

These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, *Kissing Architecture* is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation. *Hong Kong Master Tax Guide 2012/13* Rowman & Littlefield

WHY DO BAD GUYS LIVE IN GOOD HOUSES? From Atlantis in *The Spy Who Loved Me* to Nathan Bateman's ultra-modern abode in *Ex Machina*, big-screen villains often live in architectural splendor. From a design standpoint, the villain's lair, as popularized in many of our favorite movies, is a stunning, sophisticated, envy-inducing expression of the warped drives and desires of its occupant. *Lair: Radical Homes and Hideouts of Movie Villains*, celebrates and considers several iconic villains' lairs from recent film history. From futuristic fantasies to deathtrap-laden hives, from dwellings in space to those under the sea, pop culture and architecture join forces in these outlandish, primarily modern homes and in *Lair*, which

features buildings from fifteen films, including: Dr. Strangelove Or: How I Learned to Stop Worrying and Love the Bomb Star Wars The Incredibles Blade Runner 2049 You Only Live Twice The Ghost Writer Body Double North by Northwest Edited by acclaimed architect Chad Oppenheim with Andrea Gollin, Lair includes interviews with production designers and other industry professionals such as Ralph Eggleston, Richard Donner, Roger Christian, David Scheunemann, Gregg Henry, and Mark Digby. Contributors include director Michael Mann, cultural critic Christopher Frayling, museum director Joseph Rosa, and architect Amy Murphy. Architectural illustrations and renderings by Carlos Fuego provide multiple in-depth views of these spaces.

The Fourth Edition of Statistics: A Gentle Introduction shows students that an introductory statistics

class doesn't need to be difficult or dull. This text minimizes students' anxieties about math by explaining the concepts of statistics in plain language first, before addressing the math. Each formula within the text has a step-by-step example to demonstrate the calculation so students can follow along. Only those formulas that are important for final calculations are included in the text so students can focus on the concepts, not the numbers. A wealth of real-world examples and applications gives a context for statistics in the real world and how it helps us solve problems and make informed choices. New to the Fourth Edition are sections on working with big data, new coverage of alternative non-parametric tests, beta coefficients, and the "nocebo effect," discussions of p values in the context of research, an expanded discussion of

confidence intervals, and more exercises and homework options under the new feature "Test Yourself." Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Currently, individuals interested in seeking an in-depth discussion of transplantation immunology must seek individual articles published in several journals, or extrapolate information from various non-transplant immunology textbooks.

The purpose of this text is to provide the reader with a single source of information for the basic science of immunobiology of organ transplantation. It is unique that it focuses on immunobiology from the basic research side, with an emphasis on the cellular and molecular levels. The readers will be physicians, scientists, and graduate students interested and engaged in the study of immunology as it relates to allo- and xenotransplantation. This book is designed to be the reference standard for the immunobiology of transplantation.

Art historian James Hyman takes a fresh look at the crucial years after the Second World War when attempts were made to revive European culture and debates about the future of art were fierce. The author proposes that realism in Europe during the early Cold War years occupied a radical vanguard position and stood in opposition to the competing claims made for American Abstract Expressionism. He examines two distinct visions of realism - social realism and Modernist realism - and explores their political implications and ideological significance. Hyman argues that this Battle for Realism shaped and internationalised British art and addresses a range of artists, from Modernist realists such as Auerbach, Bacon, Freud, Kossoff, Moore and Sutherland to social realists Hogarth, de Francia and the 'kitchen-sink painters'. He also illuminates the impact of foreign and emigre artists on British culture, addressing artists such as Giacometti, Guttuso and Picasso, and examining the claims made for London as an art centre to rival the Ecole de Paris and the New York School. Hyman draws on contemporary critical writing to give fresh insights into the art debates of the period and gives new prominence to Environment, Health, and Safety Becca Jameson Publishing

A new and truly awesome collection of comic fantasy masterpieces! It isn't often you find a posse of Greek goddesses putting down insurrection among unruly classical mortals, stranded aliens escaping earth in a church converted into a rocket, or a light-fingered time-traveller attempting to steal the universe - but here they all are, in another selection of bizarre comic fantasies.

A young Registered Nurse, not long out of her training years in a large, busy county hospital serving a major U.S. city, begins her day in the acute locked psychiatric ward of a smaller county hospital nearby. While she knows, in general, what to expect, the details that will emerge over the next eight hours are as yet not revealed. What follows, taken from the notes in her journal concerning that day, reflect the vast array of tragedies, great and small, the triumphs, the hopes, and the disappointments of a representative sample of the 20% of American citizens who will, during their lives, experience

similar events that will cause them to spend time in such a setting. Events like suicide attempts, incest, murder, profound unhappiness, entrapment by mind-wrenching drugs, failed loves, and bizarre behavior, not confined to the patients alone, that set people apart from their fellows, along with hope and the earnest wish for a better life. This book, all of it true - though the names of the actors have been disguised - describes a burgeoning problem: what is, sometimes loosely and inaccurately, termed "mental illness" and modern attempts to deal with it. Many of them challenge our best efforts to define what is, and what is not, "normal." Their numbers are growing; the cost of their care takes a huge portion

of health expenditures. Solutions are far from being at hand, yet those solutions are a measure of our humanity. Some of the people you will meet here are your friends and neighbors, your family and, just possibly, you yourself.

ADHD is the most commonly diagnosed childhood behavioral disorder. Moreover, many students receiving special education assistance are reported to have ADHD. Children with ADHD may experience significant school adjustment difficulties and achievement problems. Problem behaviors associated with attention deficits

and hyperactivity often have a negative impact on the classroom, and, therefore, may compromise the learning environment for many, if not all, students. There is a critical need for school professionals to identify, assess, and treat students with ADHD. Identifying, Assessing, and Treating ADHD at School brings science to practice, providing school professionals invaluable information to meet the needs of children with ADHD. This volume, designed as a practical, easy-to-use reference for school psychologists and other mental health and educational professionals: Explains

why school psychologists and their colleagues need to be prepared and able to identify and serve students with ADHD. Identifies the prevalence, influences, and associated conditions. Provides a review of screening, referral, and diagnostic assessment processes. Offers guidance on conducting psychoeducational assessments. Reviews evidence-based treatments. Offers practical guidance on setting up programs that address individual and classroom issues. School psychologists and other education and mental health professionals will find Identifying, Assessing,

and Treating ADHD at School an exceptional resource in working to enhance the mental health and academic development of students.

An All in One Guide to Master your Nikon D850 The Nikon D850 is a high resolution full-frame DSLR, boasting a 46MP backside-illuminated CMOS sensor. But, in a fairly radical departure for the series, it is also one of the company's fastest-shooting DSLRs. This combination of properties should significantly widen the camera's appeal to high-end enthusiasts as well

as a broad range of professional photographers. The use of a backside illuminated (BSI) sensor means that the light collecting elements of the sensor are closer to the surface of the chip. This should not only increase the efficiency of the sensor (improving low light performance) but should also be expected to make the pixels near the edges of the sensor better able to accept light approaching with high angles of incidence, improving peripheral image quality. Taking the perfect shot requires more than just years of experience and good lighting! Knowing Your

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice

pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking

into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

The Battle for Realism

SAGE Publications

This provocative, “critically important” memoir of working-class boyhood in rural Indiana offers a searing cultural analysis of toxic masculinity in American culture (NPR). As progressivism changes American society, and globalism shifts labor away from traditional manufacturing, the roles that have been prescribed to men since the Industrial

Revolution have been rendered obsolete. Donald Trump's campaign successfully leveraged male resentment and entitlement, and now, with Trump as president and the rise of the #MeToo movement, it's clear that our current definitions of masculinity are outdated and even dangerous. Deeply personal and thoroughly researched, the author of *The People Are Going to Rise Like the Waters Upon Your Shore* has turned his keen eye to our current crisis of masculinity using his upbringing in rural Indiana to examine the personal and societal dangers of the patriarchy. *The Man They Wanted Me to Be* examines how we teach boys what's expected of men in America, and the long-term effects of that socialization which include depression, shorter lives, misogyny, and suicide. Sexton turns his keen eye

to the establishment of the racist patriarchal structure which has favored white men, and investigates the personal and societal dangers of such outdated definitions of manhood. “ . . . exposes the true cost of toxic masculinity . . . and takes aim at the patriarchal structures in American society that continue to uphold an outdated ideal of manhood.” —Book Riot

Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a

foreign land. The Company will pay the cost of the lady ’ s dowry and travel. Returns not permitted, orphans preferred.

Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana ’ s future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a

colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey – but what awaits them on the other side of the world is nothing like what they 've been promised... Based on true history, this is a gripping and unputdownable historical novel, perfect for fans of *Girl with a Pearl Earring*, *The Miniaturist* and *The Indigo Girl*.
