Cut the door to the

correct height using a straightedge guide and a circular saw. If you need to remove more than 1 inch, take half off the bottom of the door and half off the top. Trim the door to width in the same manner. Tip: If removing less than 3/16 inch, use a hand plane instead of a circular saw.

INSTALLA for Interior Pre-Hung Doors 5.

Level the latch side of the jamb in the same manner as the hinge jamb. Ensure the jamb is not twisted and that the spacing between the jamb and door is uniform on all sides. Adjust the

latch side of the jamb as necessary. 6. Shim the top of the jamb in the center of the opening and fasten with a 10d ...

Sliding Doors How-To | Door Hardware Manufacturer | Prime-Line

This requires removal of the door from the outside. You will need to first remove the fixed glass panel. Step 5(a). Remove the threshold, if necessary, to move the fixed door within the frame. Simply prying up with a flathead screwdriver should be sufficient to remove the threshold on most doors. Step 5(b).
