Minnesota has an almost limitless supply of fishable water, much of it only lightly flyfished. There are excellent trout streams in the southeast corner, strong salmon runs in the northeast, & more smallmouth, pike, & muskie fishing than seems possible. Other anglers have known for years what flyfishers are just discovering: Minnesota has some of the best fishing in the country -- & this book details it all. An all-in-one travel/fly fishing guidebook.

S2SIMSAP and SIMTIM are computer programs that have been developed to simulate the stand growth and development of natural and treated even-aged northern hardwood stands. SIMSAP begins with species distributions by quality classes in sapling stands after regeneration. SIMTIM, the poletimber-sawtimber-harvest phase, uses stocking guides based on quadratic mean stand diameter, number of trees, and basal area per acre of trees in the main crown canopy. Using available data, the connecting phases of the models have been tested to determine the
