'An enchanting book...poignant and passionate.' Geographical 'A captivating and absorbing account.' Sir David Attenborough Madagascar is one of the world's natural jewels, with over ninety per cent of its wildlife found nowhere else on Earth. Few people knew it better than the pioneering primatologist and conservationist, Alison Jolly. Thank You, Madagascar is her eyewitness account of the extraordinary biodiversity of the island, and the environment of its people. At the book's heart is a conflict between three different views of nature. Is the extraordinary forest treasure-house of Madagascar a heritage for the entire world? Is it a legacy of the forest dwellers' ancestors, bequeathed to serve the needs of their living descendants? Or is it an economic resource to be pillaged for short-term gain and to be preserved only to deliver benefits for those with political power? Exploring and questioning these different views, this is a beautifully written diary and a tribute to Madagascar.

The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards II: Unnatural Selection brings together a fresh collection of the hapless, the heedless, and the just plain foolhardy among us. Salute the owner of an equipment training school who demonstrates the dangers of driving a forklift by failing to survive the filming of his own safety video. Gawk at the couple who go to sleep on a sloping roof. Witness the shepherd who leaves his rifle unsecured—only to be accidentally shot by one of his own flock. With over one hundred Darwin Award Winners, Honorable Mentions, and debunked Urban Legends, plus science and safety tips for avoiding the scythe of natural selection, The Darwin Awards II proves once again how uncommon common sense can be.

*Thank You, Madagascar* Springer Science & Business Media

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored

over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In Mortal Combat is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

North and South America share similar human and ecological histories and, increasingly, economic and social linkages. As such, issues of ecosystem functions and disruptions form a common thread among these cultures. This volume synthesizes the perspectives of several disciplines, such as ecology, anthropology, economy, and conservation biology. The chief goal is to gain an understanding of how human and ecological processes interact to affect ecosystem functions and species in the Americas. Throughout the text the emphasis is placed on habitat fragmentation. At the same time, the book provides an overview of current theory, methods, and approaches used in the analysis of ecosystem disruptions and fragmentation.

This volume examines fish sounds that have a proven signal function, as well as sounds assumed to have evolved for communication purposes. It provides an overview of the mechanisms, evolution and neurobiology behind sound production in fishes, and discusses the role of fish sounds in behavior with a special focus on choice of mate, sex-specific and age-specific signaling. Furthermore, it highlights the ontogenetic development of sound communication and ecoacoustical conditions in fish habitats and the influence of hormones on vocal production and sound detection. Sound Communication in Fishes offers a must-have compendium for lecturers, researchers and students working in the fields of animal communication, fish biology, neurobiology and animal behavior.
