Ask Dr. Mueller Cengage Learning  
Surface engineering is an increasingly important field and consequently those involved need to be aware of the vast range of technologies available to modify surfaces. This text provides an up-to-date, authoritative exposition of the major condensed phase methods used for producing metallurgical and ceramic coatings. Each method is discussed thoroughly by an expert in that field. In each chapter the principle of the method, its range of applications and technical aspects involved are described. The book not only informs the reader about established technologies familiar only to specialists, but also details activity on the frontier of coating technology providing an insight into those potential technologies not yet fully developed but which should emerge in the near future.  
**Weird But True 9 Serpents Tail**  
This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.  
The Foam Book Allied Publishers  
These idyllic islands are famed for their palm-fringed beaches, luxurious resorts, and relaxed pace of life. This fully updated guide caters to all types of visitors, from watersports enthusiasts and nature lovers to festival seekers and those wishing to explore the rich island history. Diving safaris, coral garden snorkeling, surfing, windsurfing, and deep-sea fishing are all covered for the energetic tourist, while exploring the atolls and resorts with the aid of this thorough guide is an attractive pastime for the traveler seeking tranquility. Features include: >How to choose the perfect resort for tastes and budgets >Getting around the islands, with cruise options >A wide variety of watersports >Accommodation options including beach cottages and overwater bungalows >Maldivian people and culture and useful words and phrases in Dhivehi  
**Speech and Audience in Thucydides' Spartan Debates** Simon and Schuster  
On a September morning in 1973, a hospital administrator in New York City learned of a rogue experiment in progress at his institution and ordered the destruction of a test tube containing a frothy mixture of human eggs and sperm. Had the experiment been allowed to continue, it might have resulted in the first human fetus created through in vitro fertilization ... [A]ward-winning journalist Robin Marantz Henig ... takes us back to the early days of IVF, when the procedure was viewed as crackpot science and its pioneers as outsiders in the medical world. Henig lays out the ethical and political battlefield of the 1970s—a battlefield that is recreated with each new technology—and traces the sea change that has occurred in the public perception of "test tube babies." ... [T]hat it was the first step down the

slippery slope toward genetic engineering, designer babies, and human clones ... [and] a compelling story from the not-so-distant past, which brilliantly presents the scientific and ethical dilemmas we confront ever more starkly as germ-line engineering and human cloning become possible.--Provided by publisher.  
**The Writings of Cookie Mueller** Penguin  
Will these two siblings help solve a family mystery? Find out in one of the earliest Newberry Honor Award winners! Brother and sister, Oliver and Janet, are excited to spend their summer with their cousin Jasper, who has always been cheerful and fun to be around. However, when the children arrive at his home, Jasper is despondent and distracted—nothing like the cousin they know. Eventually, the children discover that their cousin has been having trouble with a neighbor but is doing nothing to fix the problem! The siblings want to help . . . but how? Enter in The Beeman, a neighbor who regales Oliver and Janet with enchanting stories of local history. The two siblings visit the friendly neighbor more and more to hear his amazing stories but continue to wonder how they can help their cousin. As it turns out, The Beeman's tales of their family history just so happen to contain the secret to helping Jasper with his villainous neighbor! With original illustrations and beautiful, descriptive prose, this classic award-winner is perfect for young readers eager for a good, wholesome mystery. Whether you read it alone or as a family, get ready to be swept away by The Windy Hill!  
*Catfantastic III* Sterling Mystery Series  
Early in the 21st century, after the Great Recession, poet and young mother Maggie Roche is harassed by a lovely woman, Sriyanie, and a famous neuroscientist, David Elfield. She doesn't know it yet, but she is about to become history's first time traveler. When agents from the far future attempt to kill her, in baffled fury she slingshots herself into the 7th millennium. Instantly she's on the run from the Ull Lords and their virtual reality devotees. These superbeings are cyborged humans constructed to live forever, with the ambition to rule the universe. Maggie is having none of this. Encountering an earlier version of Sriyanie, her fated future role in the formation of the multiverse falls upon her shoulder like a thunderous lightningbolt. A Being at the end of time she calls the Something wages endless war with its foes, the Ull Lords. Torn from her beloved child and her own time, Maggie must choose whether to accept this alienating path into an alternative cosmic history fit for a poet and a free woman.

*The Language Lens* Racehorse for Young Readers  
Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through

Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.  
*Get Real* Simon and Schuster  
Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.  
**How To Have A Beautiful Mind** Peterson Nelnet Company  
Winner of the 2009 International Conference on Romanticism's Jean-Pierre Barricelli Award for the best book in Romanticism studies As the mental faculty that mediates between self and world, mind and body, the senses and the intellect, imagination is indispensable for modern models of subjectivity. From Ren Descartes's Meditations to the aesthetic and philosophical systems of the Romantic period, to think about the subject necessarily means to address the problem of imagination. In close readings of Descartes, Kant, Fichte, Hardenberg (Novalis) and Coleridge, and with a sustained return to the origins of the discourse about imagination in Greek antiquity, Alexander Schlutz demonstrates that neither the unity of the subject itself, nor the unity of the philosophical systems that are based on it, can be conceptualized without recourse to imagination. Yet, philosophers like Descartes and Kant must deny imagination any such foundational role because of its dangerous connection to the body, the senses and the unruly passions, which threatens the desired autonomy of the rational subject. The modern subject is simultaneously dependent upon and constructed in opposition to imagination, and the resulting ambivalence about the faculty is one of the fundamental

---

conditions of modern models of subjectivity. Schlutz's readings of the Romantic poet-philosophers Coleridge and Hardenberg highlight that also their texts are not free of fears about the faculty's disruptive potential and its connection to the body. While imagination is now openly enlisted to produce the aesthetic unity of subjectivity, it still threatens to unravel and destroy a subject that needs to keep the body and its desires at bay in order to secure its rational and moral autonomy. The dark abyss of a self not in control of its thoughts, feelings, and desires is not overcome by the philosophical glorification of the subject's powers of imagination.

Springer Science & Business Media

Larson's ALGEBRA AND TRIG is ideal for a two-term course and is known for delivering sound, consistently structured explanations and carefully written exercises of mathematical concepts. Updated and refined through learning design principles, the 11th edition removes barriers to learning and offers a carefully planned and inclusive experience for all students. New Review & Refresh exercises prepare students for each section and provide a general skill review throughout the text. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. Larson's learning support includes free text-specific tutorial support at CalcView.com and CalcChat.com. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**High Fidelity** Chicken Socks

From a two-time winner of the Philip K. Dick award, and one of the founding fathers of cyberpunk comes a novel about a very modern nightmare: the most destructive computer virus ever has been traced to your machine. Computer programmer Jerzy Rugby spends his days blissfully hacking away in cyberspace – aiding the GoMotion Corporation in its noble quest to create intelligent robots. Then an electronic ant gets into the machinery ... then more ants .... then millions and millions of the nasty viral pests appear out of nowhere to wreak havoc throughout the Net. And suddenly Jerzy Rugby is Public Enemy Number One, wanted for sabotage, computer crime, and treason – a patsy who must now get to the bottom of the virtual insectile plague. "Rudy Rucker warms the cockles of my heart ... I think of him as the Scarlet Pimpernel of science fiction." – Philip Jose Farmer

Mapping the Bones University of Michigan Press  
Retiring prosecutor Jessica Yardley can't turn down one last investigation. This time, it's a set of murders inspired by a series of grisly paintings called The Night Things. She's the only one who can catch the killer, who's left a trail of bodies in a rural community outside of Las Vegas.
