SOC SAGE Publications
Machiavelli Had it Easy is
an engaging text for the
emerging discipline of

governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age, yet few reconcile silos of business, legal expertise and regulatory public-interests for informed decisions. This text presents research and a market-

tested decision-framework for comparative law, market practice, and human nature in the vital strategic-oversight role of governance. Informed by cognitive science, business practice and legal duties, one conclusion is that bias and self-interests are instinctive but reconciling best-interests is not. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry-level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule-of-law and those tripping on gaps in comparative jargon. Part two is a series of practical hot-topics in the context of

law and governance; part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers, and business operations and market-policy experts from around the world work together, and; professors, professionals and students anticipate change. After drilling through accountability and liability for hybrid organizations, typical crises are revealed to be from a lack of aligning interests and related information churn. Conclusions of the how and why of governance systems link the human condition and the rule-of-law in the digital age. A Natural Environmental Lens on Organizations and Management MDPI Readers gain a strong understanding of the importance of business

ethics, sustainability, and stakeholder management from a strong managerial perspective with Carroll, Brown and Buchholtz ' s BUSINESS AND SOCIETY: ETHICS, SUSTAINABILITY, AND STAKEHOLDER MANAGEMENT, 10E. Readers see, first-hand, how the most successful business decision makers are able to balance and protect the interests of various stakeholders, including investors, employees, consumers, the community, and the environment. They review the importance of business decision making particularly now, as businesses recover from a perilous financial period. Readers are able to examine in detail the social, legal, political, and ethical responsibilities of a business to all external

and internal groups that have a stake, or interest, in that business.

Functions, Applications, and Skill Development
American Bar Association
Sitting at the nexus of labor migration and health care work, this book examines the dynamic relationship between nurses' cross-border movement and efforts to regulate their migration. Grounded in multi-sited qualitative

research, this volume analyzes the changing social dimensions and transnational scale of global nursing, focusing particularly on the recruitment from the Philippines to Germany. The flow of nursing skills from resource-poor countries to well-off ones is not only producing a global care crisis, but also serves as a prime example of the international race for talent and skill. As it takes a critical eye to the emerging field of migration governance or management as the preferred policy

response to competing discourses of global care crises and the global competition for skilled care work, this book highlights not only the shifting web of actors, discourses, and practices in care work migration management, but also, and more importantly, how various forms of care figure in the global migration of nurses.

In this volume cultural, social and cognitive influences on the research and teaching of mathematical modelling are explored from a variety of theoretical and practical perspectives. The authors of the current volume are all members of the International Community of Teachers of Mathematical Modelling and Applications, the peak research body in this field. A distinctive feature of this volume is the high number of authors from South American countries. These authors bring quite a different perspective to modelling than has been showcased in previous books in this series, in particular from a cultural point of view. As well as recent international research, there is a strong emphasis on pedagogical issues including those associated with technology and assessment, in the teaching and learning of modelling. Applications at various levels of education are exemplified. The contributions reflect common issues shared globally and represent emergent or on-going challenges.

SOC Vikram Publishers Pvt Ltd

Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face-to-face teaching, such as overcrowded classrooms and shortage of certified teachers. While online learning has been recognized as a possible approach to deliver more desirable learning outcomes, close to half of online students drop out as a result of student-related, course-related, and out-of-school-related factors (e.g., poor self-regulation; ineffective teacher-student, student-student, and platform-student interactions; low household income). Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason. A well-implemented early warning system, therefore, can help educators identify students at risk of dropping out and assign and monitor interventions to keep

them on track for graduation.

Despite the popularity of early warning systems, research on their design and implementation is sparse. *Early Warning Systems and Targeted Interventions for Student Success in Online Courses* is a cutting-edge research publication that examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice. Moreover, this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and, therefore, more actionable. Highlighting a range of topics such as curriculum design, game-based learning, and learning support, it is ideal for academicians, policymakers, administrators, researchers, education professionals, instructional designers, data analysts, and students.

The New Business Road Test

SAGE Publications

This book examines the role and impact of EU, international human rights and refugee law on national laws and policies for integration and argues for a broad understanding of the relationship between integration and the law. It analyses the legal foundations of integration at the international and regional levels and examines the interaction of national, EU and international legal spheres, highlighting the significance of these dimensions of the relationship between integration and the law. The book draws together these central themes to enhance our understanding of the connections between integration and the law. It also makes specific recommendations for the development of holistic, human-rights based approaches to integration in EU Member States. The book will be of value to academics and researchers working in the areas of immigration, and refugee law, as well as those interested in cultural diversity both from a

legal and sociological perspective.

The Impact of Its Policies and Practices Bloomsbury Publishing

Strategic Sustainability examines how organizations can implement environmental sustainability science, theories, and ways of thinking to become more competitive. Including examples and ideas implemented in various countries, it is based on known scientific principles about the natural world and organizational principles focusing on the work domain. The intersection of these two realms of research creates a powerful and new approach to comprehensive, seemingly contradictory issues. Daniel S. Fogel draws from disparate fields and creates a story about organizations, their future and how people are part of the problem and, more importantly, part of the solution. Readers will find ways to take action to improve

organizations and avoid denigrating our natural environment, learning to be mindful of the urgency we should feel to improve our impact on the world. The focus on the natural environment provides a powerful focus for creating value in organizations and addressing the major challenges we all face.

Advanced sustainability students, working professionals and board members, managers and legislators responsible for governing organizations or implementing public policy will find this book useful. A companion website features an instructor's manual with test questions, as well as 38, 10-minute videos for classroom use.

The Model Rules of Professional Conduct provides an up-to-date resource for

information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
