Machiavelli Had it Easy is an engaging text for the emerging discipline of governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age, yet few reconcile silos of business, legal expertise and regulatory public-interests for informed decisions. This text presents research and a market-tested decision-framework for comparative law, market practice, and human nature in the vital strategic-oversight role of governance. Informed by cognitive science, business practice and legal duties, one conclusion is that bias and self-interests are instinctive but reconciling best-interests is not. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry-level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule-of-law and those tripping on gaps in comparative jargon. Part two is a series of practical hot-topics in the context of law and governance; part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers, and business operations and market-policy experts from around the world work together, and; professors, professionals and students anticipate change. After drilling through accountability and liability for hybrid organizations, typical crises are revealed to be from a lack of aligning interests and related information churn. Conclusions of the how and why of governance systems link the human condition and the rule-of-law in the digital age.

Sitting at the nexus of labor migration and health care work, this book examines the dynamic relationship between nurses' cross-border movement and efforts to regulate their migration. Grounded in multi-sited qualitative research, this volume analyzes the changing social dimensions and transnational scale of global nursing, focusing particularly on the recruitment from the Philippines to Germany. The flow of nursing skills from resource-poor countries to well-off ones is not only producing a global care crisis, but also serves as a prime example of the international race for talent and skill. As it takes a critical eye to the emerging field of migration governance or management as the preferred policy response to competing discourses of global care crises and the global competition for skilled care work, this book highlights not only the shifting web of actors, discourses, and practices in care work migration management, but also, and more importantly, how various forms of care figure in the global migration of nurses.

Biologics, A History of Agents Made From Living Organisms in the Twentieth Century INTERMEDIATE I YEAR MATHS IA (Telugu Medium) TEST PAPERS May 2014, March 2014, May 2013, March 2013, Model papers, Guess Papers, Important questions Studying the flagship New York City Police Department is critical to

understanding policing and democratic society. An examination of the department by experts who have been studying it for years, *The New York City Police Department: The Impact of Its Policies and Practices* provides a frank and open discussion about the NYPD from an elite group of scholars with varying viewpoints and concerns. The authors in this book are uniquely qualified to discuss and analyze the intricacies of policies and their impact. Researchers working the streets of Brooklyn expose stop-and-frisk policies. An expert academic covers marijuana arrest policies and their implications on citizens. The impact of the NYPD's development of innovative technology is demonstrated by a recently retired captain who worked on developing the department's real-time crime center. Presenting the insight of these and other experts, the book explores critical questions such as: How are victims of crime faring in the NYPD's performance management system? Does the NYPD manipulate crime reports to make them appear better? How does the NYPD handle mass demonstrations? How does the community view the NYPD? How can an individual start a grassroots movement to influence policy and practices? The book explores hiring, firing, and retention; analyzes crime-fighting strategies; discusses the drop in homicide rate in recent years; and reviews legal concerns and the response to public demonstrations such as the Occupy Wall Street movement. The final chapter evaluates implications of the policies the NYPD follows and analyzes how it affects policing worldwide. A scintillating exposé on police culture and resistance to change, the book is destined to encourage enhanced social discourse on the topic for years to come.

Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face-to-face teaching, such as overcrowded classrooms and shortage of certified teachers. While online learning has been recognized as a possible approach to deliver more desirable learning outcomes, close to half of online students drop out as a result of student-related, course-related, and out-of-school-related factors (e.g., poor self-regulation; ineffective teacher-student, student-student, and platform-student interactions; low household income). Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason. A well-implemented early warning system, therefore, can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation. Despite the popularity of early warning systems, research on their design and implementation is sparse. *Early Warning Systems and Targeted Interventions for Student Success in Online Courses* is a cutting-edge research publication that examines

current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice. Moreover, this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and, therefore, more actionable.

Highlighting a range of topics such as curriculum design, game-based learning, and learning support, it is ideal for academicians, policymakers, administrators, researchers, education professionals, instructional designers, data analysts, and students.

Parents had questions about the tests their children took at school. They considered them to be common sense questions. They posed them to the businesspeople, publishers, and politicians who championed tests. They also posed them to the school administrators, teachers, and union leaders who criticized them. This book examines the questions the parents posed, the answers they elicited, and the changes they prodded.

The global economy is yet to recover from the aftershocks of the Global Financial Crisis (GFC). In particular many national economies are struggling to adjust to austerity programs that are a direct result of the toxic effects of the crisis. Governments, regulatory agencies, international organisations, media commentators, finance industry organisations and professionals, academics and affected citizens have offered partial explanations for what has occurred. Some of these actors have sought to introduce legislative and other regulatory initiatives to improve operational standards in capital markets. However, the exposure post-GFC of the scandal surrounding the manipulation over many years of the London Interbank Offered Rate (LIBOR) highlighted that the most important obstacles to counter the destructive potential of our global finance system are normative not technical. Regulating the culture of the finance sector is one of the greatest challenges facing contemporary society. This edited volume brings together leading professionals, regulators and academics with knowledge of how cultural forces shape integrity, risk and accountability in capital markets. The book will be of benefit not only to industry, regulatory and academic communities whose focus is upon financial markets and professionals. It is of value to any person or organisation interested in how the cultural underpinnings of the finance sector shape how capital markets actually operate and are regulated. It is a stark lesson of history that financial crises will occur. As national economies become ever more inter-connected and inter-dependent under conditions of global financial capitalism, it becomes ever more important to know how cultural and other normative forces might be

adjusted to militate against the effects of future disasters.

In 1950s America, it was remarkably easy for police to arrest almost anyone for almost any reason. The criminal justice system-and especially the age-old law of vagrancy-served not only to maintain safety and order but also to enforce conventional standards of morality and propriety. A person could be arrested for sporting a beard, making a speech, or working too little. Yet by the end of the 1960s, vagrancy laws were discredited and American society was fundamentally transformed. What happened? In *Vagrant Nation*, Risa Goluboff answers that question by showing how constitutional challenges to vagrancy laws shaped the multiple movements that made "the 1960s." Vagrancy laws were so broad and flexible that they made it possible for the police to arrest anyone out of place: Beats and hippies; Communists and Vietnam War protestors; racial minorities and civil rights activists; gays, single women, and prostitutes. As hundreds of these "vagrants" and their lawyers challenged vagrancy laws in court, the laws became a flashpoint for debates about radically different visions of order and freedom.

Goluboff's compelling account of those challenges rewrites the history of the civil rights, peace, gay rights, welfare rights, sexual, and cultural revolutions. As Goluboff links the human stories of those arrested to the great controversies of the time, she makes coherent an era that often seems chaotic. She also powerfully demonstrates how ordinary people, with the help of lawyers and judges, can change the meaning of the Constitution. The Supreme Court's 1972 decision declaring vagrancy laws unconstitutional continues to shape conflicts between police power and constitutional rights, including clashes over stop-and-frisk, homelessness, sexual freedom, and public protests. Since the downfall of vagrancy law, battles over what, if anything, should replace it, like battles over the legacy of the sixties transformations themselves, are far from over.

At the heart of this volume lies an exploration of what actually happens to languages and their users when cultures come into contact. What actions do supra-national institutions, nation states, communities and individuals take in response to questions raised by the increasingly diverse forms of migration experienced in a globalized world? The volume reveals the profound impact that decisions made at national and international level can have on the lives of the individual migrant, language student, or speech community. Equally, it evaluates the broader ramifications of actions taken by migrant communities and individual language learners around issues of language learning, language maintenance and intercultural contact. Reflecting Jan Blommaert's assertion that in a world shaped by globalization, what is needed is 'a theory of language in society... of changing language in a changing society', this volume argues that researchers must increasingly seek diverse methodological approaches if they are to do justice to the diversity of experience and response they encounter.

The Routledge Companion to Media and Human Rights offers a comprehensive and contemporary survey of the key themes, approaches and debates in the field of media and human rights. The Companion is the first collection to bring together two distinct ways of thinking about human rights and media, including scholarship that examines media as a human right alongside that which looks at media coverage of human rights issues. This international collection of 49 newly written pieces thus provides a unique overview of current research in the field, while also providing historical context to help students and scholars appreciate how such developments depart from past practices. It is organised thematically in five parts: Communication, Expression and Human Rights Media Performance and Human Rights: Political Processes Media Performance and Human Rights: News and Journalism Digital Activism, Witnessing and Human Rights Media Representation of Human Rights: Cultural, Social and Political. Individual essays cover an array of topics, including mass-surveillance, LGBT advocacy, press law, freedom of information and children's rights in the digital age.
