Yet, despite the trillions of dollars put to work in the debt capital markets, corporate credit is still an

unfamiliar concept to most investors compared to other asset classes, such as equities and commodities. Every red-top newspaper and 24-hour news service is happy to report the latest twitch in the Dow, FTSE or Stoxx indices but momentous moves in the iBoxx or iTraxx go unmentioned. And whereas many a talking head is happy to pose as an equity analyst, few feel comfortable venturing into the arcana of credit. Yet the corporate credit market, as the authors of this new book show, is both materially larger than its equity peer and has shown more attractive risk/reward characteristics over the last 90-odd years. In *Opening Credit*, Justin McGowan and Duncan Sankey, career credit professionals, aim to redress this by drawing on their more than 50 years' collective experience in the field to elucidate a practitioner's approach to corporate credit investment. Whilst explaining the basics of traditional credit

---

analysis and affirming its value, McGowan and Sankey also caution against its shortcomings. They demonstrate the need both to penetrate the veil of accounting to get to the economic reality behind the annuals and interim numbers and to analyse the individuals that drive them - the key executives and

board members. They employ a range of cogent and easy-to-follow case studies to illustrate the value of their executive- and governance-led approach, which places management front and centre in understanding corporate credit. Opening Credit will appeal to all those seeking a better understanding of corporate credit,

including analysts looking to develop their skills, fund managers (especially those with an eye to SRI), bankers, IFAs, financial journalists, academics and students of finance. **Generally Accepted Accounting Principles under International Financial Reporting Standards** Oswaal Books and Learning Private Limited

*ACCA Skills F6 Taxation (FA 2013) Study Text 2014* Oswaal Karnataka PUE Sample Question Papers, II PUC Class 12, Accountancy, Book (For 2022 Exam) The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-

class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. Paper P6, Advanced Taxation, requires you to extend the

---

core tax knowledge that you learnt for Paper F6. As well as widening your knowledge of the core taxes, you will need to study inheritance tax, stamp taxes and trusts for the first time. In this paper you will also be expected to comment on ethical issues. In Paper P6 all of the questions set will be scenario type questions as opposed to the purely computational questions that you met at Paper F6. The emphasis of the questions will be on the interpretation of a given situation. You may need to propose alternative strategies and compare and contrast the results. Marks will be specifically awarded in the examination for the demonstration of effective communication skills. You will also need to demonstrate that you are aware that there may be non-tax matters that should be taken into account. The important point about this paper is that you need to develop your application skills. The best way to do
