' If you want to understand Nigeria ' s history in one succinct go, this is a very good choice. ' Noo Saro-Wiwa Known as the African Giant, Nigeria's story is complex and often contradictory. How,

despite the ravages of colonialism, civil war, ongoing economic disappointment and most recently the Boko Haram insurgency, has the country managed to stay together for a hundred years? Why, despite an abundance of oil, mineral and agricultural wealth, have so many of its people remained in poverty? These are the key questions explored by Richard Bourne in this remarkable and wide-ranging account of Nigeria's history, from its creation in 1914 to the historic 2015 elections and beyond. Featuring a wealth of original research and interviews, this is an essential insight into the shaping of a country where, despite the seemingly dashed optimism that was raised at independence, there still remains hope 'the Nigeria project' may still succeed. Value Added Tax – a thorough analysis Given the ever increasing importance of indirect taxation as a source of revenue for governments, and the increasing complexity of legal framework as well as the increasing number of countries adopting indirect taxation, it is highly important to closely watch how the law is actually applied in practice. The main driving force in this area is undoubtedly the European Court of Justice. This book offers a thorough analysis but also keeps track of the ongoing developments in this area. It analyses selected topics (e.g. abuse and anti-avoidance measures, taxable base and rates, treatment of Public Bodies, exemptions, and deductions) by looking at the most important and recent judgments of the Court of Justice of the European Union. Experts from all over the world, not just from academia but also government representatives and tax practitioners, have given their input and helped to put together what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis.

*For the Sake of Present and Future Generations* Springer

The idea for this book is derived from the scantiness of academic references on the European Union's policies towards the Black Sea, relative to this region's officially stated significance for the EU. Even though the EU plays a vital role in Black Sea political agendas, the EU's cooperation with the region is not extensively covered by academic discussions and literature. This is mostly due to the fact that the EU's focus on foreign affairs is mainly associated with the Balkans, as part the current and potential expansion, and the Middle East, as a direct consequence of the upheaval of the Arab Spring. The

---

Black Sea region is crucially important for the EU because of the opportunities and challenges that the region presents, both politically and socio-economically. Contributions to this book mostly focus on specific issues of EU-Black Sea cooperation, from conflict to the environment to democracy, and how these particular relationships are perceived within the region as well as through the lenses of stakeholders such as Russia, Turkey, and the USA. Overall, the collection focuses on projecting a more efficient role and a holistic strategy for the EU in its approach towards the Black Sea region, testifying to the need for a strong EU presence. For this reason, the Black Sea area remains 'the neighbourhood too close to, yet still far from, the European Union'. This book was originally published as a special issue of the Journal of Balkan and Near Eastern Studies.

This book offers the analysis of the relationship between the Cape Town Convention and national laws on secured transactions. The first part of the book considers why national implementation is so important in the case of the Cape Town Convention and identifies how innovative the Convention is as a uniform law instrument. The second part includes chapters on those states that are Parties to the Cape Town Convention, which analyse how the Convention is implemented under the domestic law. The third part includes chapters on those states that are not Parties to the Convention, which compare their national laws and the Convention to find

---

unique features of the Cape Town Convention ' s rules. The fourth part discusses the meaning of Protocols on aircraft, railway rolling stock and space assets from the practitioner ' s point of view. As a whole, the book offers insights into the new stage of uniform private law and shows the need for further examination of the subject, which will be essential for international and national legislators, academics of comparative and international private law as well as practitioners who are the users of the uniform law regime.

Islamic Banking and Finance (IBF) has

become a growing force over the past three decades, with Pakistan being one of the IBF pioneers by converting to an ' interest-free ' banking system in 1985. However, since independence in 1947, there has been continual tension over Pakistan ' s essential character, between Islamic Minimalists, who favour a Modernist interpretation of Islam, and those who favour an Islamic Maximalist interpretation that sees Pakistan as a model Islamic state. This book analyses the push to Islamize Pakistan and its financial system by Islamic revivalists, following the early 1947 debates in the original Constituent Assembly to the final 2002 ruling on IBF of the Shariat Appellate Bench of the Pakistan Supreme Court. It examines the practice and theory behind contemporary Islamic, "Shariah-

---

compliant", banking. It offers extensive interviews with Pakistani Islamic bankers on the state of their industry and how they see it developing, and provides analysis on how the Islamic banks' customers differ from those of conventional ones. Presenting a critical analysis of Pakistan's IBF experience and offering a new insight into Pakistan's banking industry that illustrates broader political and social trends in the country, this book will be of interest to specialists on Islam, South Asia and International Economics.

Trained as a photo reconnaissance unit, Marine Observation Squadron 251 ended up serving as a fighter squadron for the duration of World War II, shooting down 32 Japanese aircraft. The squadron earned several awards for outstanding performance, including the Presidential Unit Citation. This book is the first to cover the World War II history of VMFA-251, one of the Marine Corps' longest-serving squadrons. The author traces their operations from the unit's activation on December 1, 1941, through Guadalcanal, the reduction of Rabaul and their missions over the Philippines in 1945.

The Great Deception Bloomsbury Publishing

Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional

provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe ' s financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal

---

with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities

on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

Numerous jurisdictions worldwide have

augmented their ratification of the New York Convention of 1958 with the UNCITRAL Model Law 1985 (UML), which takes a giant step forward toward global uniformity in legal application and understanding of the arbitration process. This book develops a standard or benchmark for the UML objective of uniformity, using the relevant legislation and case law of Hong Kong, Singapore, and Australia to consider whether a uniform approach to implementation of the UML and its interpretation is being achieved across those jurisdictions. The author ' s methodological tools are eminently adaptable to other jurisdictions. Given the importance of the ability to set aside an arbitral award, the body of case law on setting aside and the

---

directly related area of enforcement, the emphasis throughout is on Article 34. In addition, the study considers: - the meaning of uniformity in law and in the context of the UML; - the correct approach to interpretation of the UML pre and post Article 2A; - the interpretational relationship between the UML and the Convention on Contracts for the International Sale of Goods (CISG); - the relationship between the UML and the New York Convention; - the degree of textual uniformity of Article 34 with the three jurisdictions focused on; and - the degree of applied uniformity of Article 34 both in terms of juristic methodology and similarity of results. The author, with more than thirty years of practice in the field of commercial arbitration in Hong Kong, has had access to voluminous cases spanning decades and brings his specialist expertise to the subject. This book considers whether the UML has succeeded in its aim of achieving uniformity. It serves as a guide, both academic and practical, to exploring and adopting the correct approach to the interpretation of the UML as well as to the method of classification of court decisions under the UML. This study is of immeasurable academic and practical value.

Since its publication in 2003, *The Great Deception* has taken on the role of the Eurosceptics' bible, with the third edition helping to fuel the debate during the 2016 EU Referendum. This fourth edition celebrates the moment when the UK broke away from the European Union, having been extensively re-edited to incorporate newly available

---

archive material, and updated to include the tumultuous events of recent years. The Great Deception, therefore, tells for the first time the inside story of the most audacious political project of modern times, from its intellectual beginnings in the 1920s, when the blueprint for the European Union was first conceived by a British civil servant, right up to the point when the UK resumes its path as an independent sovereign nation after 47 years of membership of the European project in its various guises. Drawing on a wealth of new evidence and existing sources, scarcely an episode of the story does not emerge in startling new light, from the real reasons why de Gaulle kept Britain out in the 1960s to the fall of Mrs Thatcher and the build-up to the referendum campaign which had its roots in the Maastricht Treaty. The book chillingly shows how Britain's politicians were consistently outplayed in a game the rules of which they never understood. It ends by evaluating the post referendum negotiations and asking whether this is the end of an episode or

just a new beginning.

Should the European Neighbourhood Policy stop at the borders of the European Union ' s immediate neighbouring countries? This book is the first full length study of the ' neighbours of the EU ' s neighbours ' , a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU ' s broader neighbourhood are often perceived as an ' arc of crisis ' from which manifold challenges emanate for Europe. This timely book takes stock of the state of the EU ' s cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood

---

Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic ' EU Strategy for the Neighbours of its Neighbours ' which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the ' arc of crisis ' into another ' ring of friends ' .
