Should the European Neighbourhood Policy stop at the borders of

the European Union's immediate neighbouring countries? This book is the first full length study of the 'neighbours of the EU's neighbours', a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU's broader neighbourhood are often perceived as an 'arc of crisis' from which manifold

---

challenges emanate for Europe. This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and

how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic 'EU Strategy for the Neighbours of its Neighbours' which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the 'arc of crisis' into another 'ring of friends'.

Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure,

---

regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe’s financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the

---

interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

This comprehensive handbook, prepared by leading ocean policy academics and practitioners from around the world, presents in-depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross-cutting and integrated national and regional ocean policy. All chapters follow a common

framework for policy analysis. While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean (such as shipping, fishing, oil and gas development), in the last two decades, the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated, ecosystem-based vision for the governance of ocean areas under their jurisdiction. This includes goals and

---

procedures to harmonize existing uses and laws, to foster sustainable development of ocean areas, to protect biodiversity and vulnerable resources and ecosystems, and to coordinate the actions of the many government agencies that are typically involved in oceans affairs. The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and

the outcomes of the 1992, 2002, and 2012 sustainable development summits. The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated, precautionary, and anticipatory. Overall, the book provides a definitive state-of-the-art review and analysis of national and regional ocean policies around the world. **Shariah-Compliant Finance and the Quest to make Pakistan more Islamic** Linde

Verlag GmbH Since its publication in 2003, The Great Deception has taken on the role of the Eurosceptics' bible, with the third edition helping to fuel the debate during the 2016 EU Referendum. This fourth edition celebrates the moment when the UK broke away from the European Union, having been extensively re-edited to incorporate newly available archive material, and updated to include the tumultuous events of recent years.

---

The Great Deception, therefore, tells for the first time the inside story of the most audacious political project of modern times, from its intellectual beginnings in the 1920s, when the blueprint for the European Union was first conceived by a British civil servant, right up to the point when the UK resumes its path at as an independent sovereign nation after 47 years of membership of the European project in its various guises. Drawing on a wealth of new evidence and existing sources,

scarcely an episode of the story does not emerge in startling new light, from the real reasons why de Gaulle kept Britain out in the 1960s to the fall of Mrs Thatcher and the build-up to the referendum campaign which had its roots in the Maastricht Treaty. The book chillingly shows how Britain's politicians were consistently outplayed in a game the rules of which they never understood. It ends by evaluating the post referendum negotiations and asking whether this is the end of an episode or just

a new beginning.

Perspectives from Latin America and the Caribbean  
 Bloomsbury Publishing  
 This is a book about the internal dimension of the rule of law in the European Union (EU). The EU is a community based on law which adheres to and promotes a set of common values between the Member States. The preservation of these values (such as legality, legal certainty, prohibition of arbitrariness,

---

respect for fundamental rights) is pivotal to the success of European integration and the well-being of the individuals within it. Yet, the EU rule of law suffers from an imposter syndrome and has been the subject of criticism: ie that it is only part of the EU agenda in order to legitimise sweeping new powers and policies, and that it plays little or no role in promoting a culture of compliance for either deviant EU Institutions or for Member States. This book will examine whether the EU rule of law deserves those criticisms. It will offer an analytical guide to the EU rule of law by conceptualising it and locating it within the sources of EU law. It will then ask whether the EU is based on the rule of law - a question which is answered in the affirmative, but one which has to be considered in the context of compliance and the overall effectiveness of the EU enforcement acquis. It is argued that while the EU means well in its aim to preserve unity in an increasingly diversified Europe, the extent to which it can pave the way to a better world (based on a transnational rule of law concept akin to good governance and improvement of citizens' lives) is dependent on the commitment of all European integration stakeholders to the EU project. Our Study Text is the only P6 text reviewed by the examiner. It covers the entire syllabus at just the right level.

There is a chapter towards the end of the text devoted to tax planning and ethics. This chapter helps you to bridge the gap between acquiring the knowledge that you must have at this level and starting to apply that knowledge to the type of questions that you will meet. The question and answer bank will also be vital in

helping you

develop your application skills.

The questions are at a level designed to aid your transition towards the examination standard

questions that you will find in BPP Learning Media's Practice and Revision kit.

V&S Publishers Value Added Tax – a thorough analysis Given the ever increasing importance of indirect taxation as a source of

revenue for

governments, and the increasing

complexity of legal framework as well as the increasing number of

countries adopting indirect taxation, it is highly important to closely watch how the law is actually applied in practice. The main driving force in this area is

undoubtedly the European Court of Justice. This book offers a thorough analysis but also keeps track of the ongoing developments in this area. It analyses selected topics (e.g. abuse and anti-avoidance measures, taxable

---

base and rates, treatment of Public Bodies, exemptions, and deductions) by looking at the most important and recent judgments of the Court of Justice of the European Union. Experts from all over the world, not just from academia but also government representatives and tax practitioners, have given their input and helped to put together what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis.

Citizens from all walks of life took to the streets and protests erupted over the following weeks,

---

and Myanmar became the centre of global attention. This book brings up to date how the story of Myanmar's experiment with democracy unravelled over the last few years. This second edition: ? Traces the political transition of Myanmar from a military rule of nearly five decades to a short-lived democratic experiment; ? Outlines the factors that contributed to this transition and the

circumstances in which it took place; ? Shows how political groups – especially Aung San Suu Kyi's National League for Democracy (NLD) – and the military worked together and paved the way for democratisation and what led to the failure of the NLD government; ? Examines the 2020 general election and the declaration of national emergency following the NLD landslide electoral win.

Bringing together a balance of primary ethnographic fieldwork and nuanced analysis, this book will be of great interest to scholars and researchers of Asian and Southeast Asian Studies, politics and political processes, democratisation process and democratic transitions, international relations and peace and conflict studies, especially those concerned with Myanmar.

[Focus On: 100 Most Popular 21st-century English Actresses](#) by Mocktime Publication Numerous jurisdictions worldwide have augmented their ratification of the New York Convention of 1958 with the UNCITRAL Model Law 1985 (UML), which takes a giant step forward toward global uniformity in legal

---

application and understanding of the arbitration process. This book develops a standard or benchmark for the UML objective of uniformity, using the relevant legislation and case law of Hong Kong, Singapore, and Australia to consider whether a uniform approach to implementation of the UML and its interpretation is being achieved across those jurisdictions. The author's methodological tools are eminently adaptable to other jurisdictions. Given the importance of the ability to set aside an arbitral award, the body of case law on setting aside and the directly related area of enforcement, the emphasis throughout is on Article 34. In addition, the study considers: - the meaning of uniformity in law and in the context of the UML; - the correct approach to interpretation of the UML pre and post Article 2A; - the interpretational relationship between the UML and the Convention on Contracts for the International Sale of Goods (CISG); - the relationship between the UML and the New York Convention; - the degree of textual uniformity of Article 34 with the three jurisdictions focused on; and - the degree of applied uniformity of Article 34 both in terms of juristic methodology and similarity of results. The author, with more than thirty years of practice in the field of commercial arbitration in Hong Kong, has had access to voluminous cases spanning decades and brings his specialist expertise to the subject. This book considers whether the UML has succeeded in its aim of achieving uniformity. It serves as a guide, both academic and practical, to exploring and adopting the correct approach to the interpretation of the UML as well as to the method of classification of court decisions under the UML. This study is of

---

immeasurable academic and practical value.

Going to War? investigates the reasons why countries enter conflicts by considering the depth and complexity of issues surrounding military deployments. Showing how such conditions affect future decisions about the use of force, contributors to this volume study recent experiences with military interventions –

such as regional flash points, the global financial crisis, and public weariness – to outline the crucial factors that influence wartime decision-making. Through detailed discussion of threats, capabilities, trends, and the implications of Canada's and NATO's military experiences abroad, Going to War? determines that the reasons for warfare have as much to do with domestic concerns as they do with international threats. With essays by defence scientists, established and

---

emerging scholars, clear and vivid and senior military ideas on how to officers from optimize future Germany, the Western military United States, and interventions. Canada, this volume includes debates on whether the number of military fatalities is being reduced, war's changing character, and the ways in which the improvised explosive device has and will continue to challenge modern, advanced militaries deployed abroad, especially in Afghanistan and Iraq. A sophisticated exercise in foreign and defence policy analysis, *Going to War?* provides
