The Bookseller Petrogav International
This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drillling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

This book contains six reproducible jigsaw units. Based on the principles of cooperative learning, jigsaw refers to a method of instruction in which students, working in groups, are dependent on the others in the group to gather information on a topic and to complete a task. Using jigsaw ensures that every student is an active participant in the learning process. The units are designed for high school and adult students who need to improve their reading and discussion skills. These materials are designed for multi-level classes where the reading level ranges from intermediate to advanced level. The six topics in this book are: Illegal Gill Nets, Smoking Marijuana, Using Steroids, Immigration and Employment, Smoking Cigarettes in Public, and Seeing a UFO.

Electricity in Homes and Workshops Educart
Our relationships with marine mammals are complex. We have used them as resources, and in some places this remains the case; viewed them as competitors and culled them (again ongoing in some localities); been so captivated and intrigued by them that we have taken them into captivity for our entertainment; and developed a lucrative eco-tourism activity focused on them in many nations. When we first envisaged this special topic, we had two overarching aims: Firstly, we hoped to generate critical evaluation of some of our relationships with these animals. Secondly, we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer-reviewed literature. We were also asking ourselves a question about what responsibility mankind might have to marine mammals, on our rapidly changing planet? The answer to the question; can, or

should, humans have responsibility for the lives of marine mammals when they are affected by our activities? - is, in our opinion, ‘ yes ’ – and the logical progression from this question is to direct research and effort to understand and optimise the actions, reactions and responses that mankind may be able to take. We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area, and prove to be informative and stimulating.
