Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

After Southeast Asia, analysts and force planners came to the realization that there was a fundamental difference between search and rescue (SAR) in a permissive area and in an area that was not permissive (i.e., under enemy control). This second condition is now called combat search and rescue or CSAR. At the time of Desert Storm, the two forms of rescue were defined thusly: Search and Rescue (SAR): Use of aircraft, surface craft, submarines, personnel, and equipment to locate and recover personnel in distress on land or at sea. Combat Search and Rescue (CSAR): A specialized SAR task performed by rescue-capable forces to effect recovery of distressed personnel from hostile territory during contingency

operations or wartime.² The development of this rescue capability has been well established. Dr. Robert Futrell documented our efforts in Korea in *The United States Air Force in Korea, 1950-1953*. His work was followed by Dr. Earl Tilford's *Search and Rescue in South East Asia*, which eloquently chronicled the heroic efforts of the rescue crews in that conflict who brought back literally thousands of airmen. It extensively documented what is now considered the "golden age" of rescue. This work is meant to follow in those traditions and will focus on our CSAR efforts in the Persian Gulf War of 1991, or more specifically, the period of Operation Desert Storm, 17 January to 28 February 1991. Overall, CSAR in Desert Storm appears to have been a mixed bag. Because of advances in precision weaponry, Global Positioning System (GPS) technology, countermeasures, and training, relatively few coalition aircraft were shot down. Forty-three coalition aircraft were lost in combat, most over high-threat areas. Eighty-seven coalition airmen, soldiers, sailors, and marines were isolated in enemy or neutral territory. Of that total, 48 were killed, one is still listed as missing, 24 were immediately captured, and 14 were exposed in enemy territory. Of those who survived, most landed in areas controlled by enemy troops. Of the few actually rescueable, six were not rescued for a variety of reasons, but primarily because of limitations in CENTAF's ability to locate them accurately and in a timely manner.

The soldier reading these pages would do well to reflect on the wisdom of the statement exhibited in a Japanese shrine: "Woe unto him who has not tasted defeat." Victory too often leads to overconfidence and erases the memory of mistakes. Defeat brings into sharp focus the causes that led to failure and provides a fruitful field of study for those soldiers and laymen who seek in the past lessons for the future. The statesman and the informed citizen reading these pages will realize that our military means as well as our estimates and plans must always be in balance with our long-range national policy. This lesson signposted by the Battle of Manila Bay; the Treaty of Paris, signed in December 1898 when we decided to keep the Philippines; the Washington Conference of 1921-22; and the Manchurian Crisis of 1931 we ignored before Pearl Harbor. The result was defeat on the field of battle and the loss of the Philippine Islands. Work on this volume was begun in early 1947. The reader may gain some idea of the

size of the task of writing this history by an appraisal of *The Sources*.

The incredible story of an Israeli mission that rescued 103 hostages from a hijacked jetliner. On June 27, 1976, Air France Flight 139 was hijacked by terrorists and flown to Entebbe Airport in Uganda. In the following agonizing days, Israeli passengers were singled out and held hostage. A week later on July 4, one hundred Israeli commandos raced 2,500 miles from Israel to Entebbe, landed in the middle of the night, and in a heart-stopping mission that lasted ninety minutes, killed all guerillas and freed 103 hostages. In captivating detail, Stevenson provides a fast-paced hour-by-hour narration from the hijacking to the final ninety-minute mission. In addition to discussing the incredible rescue itself, Stevenson also covers the political backdrop behind the hijacking, especially Ugandan President Idi Amin's support for the hijackers, which marked one of the first times a leader of a nation had backed terrorist activities. An illustration of one nation's undying spirit, heroism, and commitment to its people in the face of threat, Operation Thunderbolt has become a legendary antiterrorist tale. Although first written in 1976 (and published within weeks of the event), Stevenson's account presents this act of terrorism in a way that is still relevant in our modern-day political climate. A factual account of what could easily be read as sensational fiction, *90 Minutes at Entebbe* will inspire, encourage, and instill hope in all readers. Message From FBI Director James B Comey: This past year, the FBI and its partners again addressed a wide range of national security and criminal threats. Together, we responded to numerous crisis incidents, such as the terrorist bombings of the Boston Marathon and the shootings at the Navy Yard in Washington, DC. We confronted a continued surge of cyber attacks against targets ranging from everyday citizens to our largest and most successful

businesses. And we stopped those who would strike at the heart of our communities—from violent gangs and white-collar criminals to child predators and corrupt public officials. A glimpse of the challenges we faced—and what we achieved together—can be found in this latest edition of The FBI Story, our annual collection of news and feature articles from the Bureau's public website. Here you can read about some of our most successful recent major investigations and operations. These include a three-day nationwide sweep targeting child prostitution in which we identified and rescued more than 100 young victims and arrested more than 150 pimps; the rescue of a 5-year-old boy held captive in a heavily armed bunker in Alabama; and uncovering of the largest domestic bribery and bid-rigging scheme in the history of federal contracting cases—one that siphoned more than \$30 million dollars of taxpayer money. This edition of the FBI Story also highlights some of the Bureau's remarkable capabilities. You will find a multi-part series on our elite Hostage Rescue Team—which marked its 30th anniversary this past year—and a feature on the Terrorist Explosive Device Analytical Center (TEDAC)—an FBI-established, multi-agency operation that celebrated its 10th anniversary in 2013.
