NEW IN PAPERBACK The Handbook of Marketing is different... that Barton Weitz and Robin Wensley are its editors should suggest something out of the ordinary. A glance at the contributors (e.g., Wilkie, Webster, Day, Shocker, Keller, Hauser, Winer, Stewart, Parasuraman, Zeithaml) puts the matter to rest. The Handbook is an extraordinary effort. The blurb on the dust jacket is an understatement - the "Handbook will be invaluable to advanced undergraduates, graduate students, academics, and thoughtful practitioners in marketing" - the book is far more than that..... in short, the Handbook is probably invaluable to all academic researchers - Journal of Marketing

Handbook of Marketing is a rich compilation of thorough reviews in the field of marketing management. The editors have selected premier marketing scholars and have given them the opportunity to examine their area of expertise in a format much less confining than those provided by the major journals in the field. The authors have taken this opportunity and have done an outstanding job not only of reviewing and structuring the extensive body of thought in many major areas of

marketing management but also of providing valuable suggestions for further research. They have brought together major contributions from the field of marketing and from other related disciplines. I strongly encourage marketing scholars to consider Handbook of Marketing. The text will certainly appeal to those with interests in marketing management; it may also be useful to those who are more focused on methodological issues but interested in topics that need additional, rigorous investigation.... In summary, Weitz and Wensley should be congratulated for the excellent work in developing Handbook of Marketing. The book fills a major void in the marketing literature on marketing management and will serve the discipline for many years to come - Journal of Marketing Research

This text achieves the rare goal of covering marketing clearly and deeply, with no unnecessary examples or pretty pictures. For the enquiring mind, it is a wonderful link between a basic knowledge of marketing concepts and a grasp of where research in marketing is taking us - Ken Simmonds, Emeritus Professor of Marketing and International Business, London Business School

Principles and Practice of Marketing McGraw-Hill Education

"... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production." -- Professor Pierre McDonagh, Associate Editor, Journal of Macromarketing (USA); Professor of Critical Marketing & Society, University of Bath, UK

Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.
