This book, written by a senior marketer with over thirty years experience of using marketing techniques and concepts, sets out to describe, contextualize and rate them. Its prime emphasis is on understanding their status so that they can be used to direct the use of shareholder funds effectively. Its conclusion is that seasoned professionals must use their judgement about when and how to use them, but they also need to understand them in depth if they are going to make well-rounded, effective investment decisions. Above all it asks: "how useful and relevant is this concept? Will it improve decision making? Does the damn thing have any credibility and does it work?" "This book combines a rigorous review of a wide range of marketing concepts with many practical examples and case studies. It can be read or dipped into both by seasoned professionals and by those just embarking on their marketing career." Sir Paul Judge, President, Chartered Institute of Marketing "Laurie Young casts an experienced and skeptical eye on many cherished marketing concepts and techniques. He provides an antidote to the tendency to adopt them without understanding their limitations and possibilities." Professor George Day, The Wharton School, Chairman of the American Marketing Association "Laurie Young has produced nothing less than the A-Z of marketing. He has journeyed far and wide mapping out hundreds of business, marketing and communications models to produce an extremely useful industry atlas. Certainly it will find a well-thumbed home on my bookshelf." Hamish Pringle, Director General, Institute of Practitioners in Advertising "This book is much needed by marketing. Its value is in challenging concepts, some of which have been the accepted norm for a long time. But as this

book shows, some of these may no longer be relevant and appropriate for marketers in today's consumer environment." Mike Johnston, CEO, Dairy Council of Northern Ireland and former Chairman of the Chartered Institute of Marketing "Senior marketers, like those who make up the membership of the Marketing Society, hone the methods and techniques they favour as their career develops. Laurie Young clearly did that and an experienced voice shines through this critique. It is heartening to find that so many concepts have a long history of producing real value for businesses but alarming to find so many of the theorists' favourites to be so groundless." Hugh Burkitt, CEO, The Marketing Society International Marketing Management Routledge

With one side of the political aisle proposing increasingly more socialistic and anti-capitalistic ideas, the other side has been quick to defend our country's great economic model, with good reason. Capitalism--spanning a spectrum from laissez faire to authoritarian--shapes the market economies of all the wealthiest and fastest-growing nations. But does that mean it is perfect as is, and that we would not all benefit from an honest evaluation and reconstruction of the free market system that has shaped our country's way of economic growth?The truth is, trouble is cracking capitalism's shiny veneer. In the US, Europe, and Japan, economic growth has slowed down. Wealth is concentrated in the hands of a few; natural resources are exploited for short-term profit; and good jobs are hard to find. In *Confronting Capitalism*, business expert Philip Kotler explains 14 major problems undermining capitalism, including: • Persistent and increasing poverty • Automation's effects on job creation • High debt burdens • Steep environmental costs • Boom-bust economic cycles • And more But this landmark book does not stop with merely revealing the problems. It also delivers a heartening message: We can turn things around! Movements toward shared prosperity and a higher purpose are reinvigorating companies large and small, while proposals abound on government policies that offer protections without stagnation. Kotler identifies the best ideas, linking private and public initiatives into a force for positive change, and offers suggestions for returning to a healthier, more sustainable capitalism that works for all.

This book takes as its perspective that the customer undoubtedly is positioned in the center of the firm's overall management activities. True understanding of the customer requires efficient marketing research about the firm's international business environment. As discussed in the first chapters of the book, the firm's business success depends in part on its ethical standards; thus awareness of its environmental and social responsibility is required. The following chapters concentrate on various aspects of culturally biased customer behavior and how the firm ensures sensitivity when planning and selecting its marketing strategies. The most efficient techniques of international market segmentation, targeting, and strategic competitive positioning are introduced. Furthermore, concepts of consumer loyalty programs and their implementation in diversified international markets are presented. An important part is dedicated to describing suitable mixes of marketing policies for firms operating in culturally heterogeneous international markets. Finally, forecasting changes in consumer behavior as a tool of planning international marketing activities is taken into consideration. Marketing control mechanisms that seek to increase efficiency of selected marketing activities further contribute to the valuable insights of this publication.
