John Marks is something of a national treasure. Warm, funny, passionate, opinionated and occasionally contrary, he is a man whose life for more than 40 years marched in beat with that of the National Health Service. There is scarcely a medical issue or controversy in which John Marks was not involved. 'Abortion law reform, the doctors' 1970s revolt against the General Medical Council, the foundation of the Royal College of General Practitioners, countless NHS reorganisations, and the bloody battle over NHS pay beds and the pay of junior doctors are just a sample. Then there was the fierce, principled battle over how the medical profession and the public should respond to the terror of a new disease - AIDS. And the great war that was fought over the Conservatives introduction of market forces into the NHS in the late 1980s and early 1990s - an approach to running the NHS that lives on, reincarnated, under the current Labour government. 'In all of these John Marks played more than a walk-on part. In many he was a principal actor. 'For anyone wanting fully to understand the BMA's role in all this, this book is thus required reading. But it is much more than just a dry history of times past. It is laced with anecdote, from the horrifying to the hilarious, and on to high politics. 'John Marks' account of his life and times provides the tale of a warm, human, liberal and occasionally buccaneering man whose passion for life and causes leaves even those who do not always agree with him eager to count him among their friends.' Nicholas Timmins in his Foreword

*Report of the Comptroller and Auditor-General of India* Heinemann  
Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation

examination of the future look like? participants from government (national and provincial),

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs--who account for more than 9 percent of enrollment in grades K-12 in U.S. schools--are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how

evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

The intent in this book is to tear away the veil of secrecy that surrounds incestuous abuse in white South Africa by presenting five in-depth personal accounts of this heinous form of sexual exploitation as told by the survivors. Each of these accounts includes an analysis of important incest-related issues raised by the survivor's story. Another objective is to explore the connections between the often cruel sexual exploitation of girls by their white male relatives and the brutal exploitation of black people by white men in South Africa.

The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

A Guide for States and School Districts National Academies Press

State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. Testing, Teaching, and Learning is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. Testing, Teaching, and Learning will be an important tool for all involved in educating disadvantaged students--state and local administrators and classroom teachers.
