An African Childhood Cambridge University Press

NEW YORK TIMES BESTSELLER • A worthy heir to Isak Dinesen and Beryl Markham, Alexandra Fuller shares visceral memories of her childhood in Africa, and of her headstrong, unforgettable mother.

“ This is not a book you read just once, but a tale of terrible beauty to get lost in over and over. ” —Newsweek “ By turns mischievous and openhearted, earthy and soaring . . . hair-raising, horrific, and thrilling. ” —The New Yorker Though it is a diary of an unruly life in an often inhospitable place, *Don ' t Let ' s Go to the Dogs Tonight* is suffused with Fuller ' s endearing ability to find laughter, even when there is little to celebrate. Fuller ' s debut is unsentimental and unflinching but always captivating. In wry and sometimes hilarious prose, she stares down disaster and looks back with rage and love at the life of an extraordinary family in an extraordinary time. From 1972 to 1990, Alexandra Fuller—known to friends and family as Bobo—grew up on several farms in southern and central Africa. Her father joined up on the side of the white government in the Rhodesian civil war, and was often away fighting against the powerful black guerilla factions. Her mother, in turn, flung herself at their African life and its rugged farm work with the same passion and maniacal energy she brought to everything else. Though she loved her children, she was no hand-holder and had little tolerance for neediness. She nurtured her daughters in other ways: She taught them, by example, to be resilient and self-sufficient, to have strong wills and strong opinions, and to embrace life wholeheartedly, despite and because of difficult circumstances. And she instilled in Bobo, particularly, a love of reading and of storytelling that proved to be her salvation. Alexandra Fuller writes poignantly about a girl becoming a woman and a writer against a backdrop of unrest, not just in her country but in her home. But *Don ' t Let ' s Go to the Dogs Tonight* is more than a survivor ' s story. It is the story of one woman ' s unbreakable bond with a continent and the people who inhabit it, a portrait lovingly realized and deeply felt. Praise for *Don ' t Let ' s Go to the Dogs Tonight* “ Riveting . . . [full of] humor and compassion. ” —O: The Oprah Magazine “ The incredible story of an

incredible childhood. ” —The Providence Journal

Testing and diagnosis of hepatitis B (HBV) and C (HCV) infection is the gateway for access to both prevention and treatment services, and is a crucial component of an effective response to the hepatitis epidemic. Early identification of persons with chronic HBV or HCV infection enables them to receive the necessary care and treatment to prevent or delay progression of liver disease. Testing also provides an opportunity to link people to interventions to reduce transmission, through counselling on risk behaviors and provision of prevention commodities (such as sterile needles and syringes) and hepatitis B vaccination. These are the first WHO guidelines on testing for chronic HBV and HCV infection and complement published guidance by WHO on the prevention, care and treatment of chronic hepatitis C and hepatitis B infection. These guidelines outline the public health approach to strengthening and expanding current testing practices for HBV and HCV, and are intended for use across age groups and populations.

Giller Prize-winner M.G. Vassanji ' s *The In-Between World of Vikram*

Lall is a haunting novel of corruption and regret that brings to life the complexity and turbulence of Kenyan society in the last five decades. Rich in sensuous detail and historical insight, this is a powerful story of passionate betrayals and political violence, racial tension and the strictures of tradition, told in elegant, assured prose. The novel begins in 1953, with eight-year-old Vikram Lall a witness to the celebrations around the coronation of Queen Elizabeth II, just as the Mau Mau guerilla war for independence from Britain begins to gain strength. In a land torn apart by idealism, doubt, political upheaval and terrible acts of violence, Vic and his sister Deepa must find their place among a new generation. Neither colonists nor African, neither white nor black, the Indian brother and sister find themselves somewhere in between in their band of playmates: Bill and Annie, British children, and Njoroge, an African boy. These are the relationships that will shape the rest of their lives. We follow Vikram through the changes in East African society, the immense promise of the fifties and sixties. But when that hope is betrayed by the corruption and violence of the following decades, Vic is drawn into the Kenyatta government's orbit of graft and power-broking. Njoroge, his childhood friend, can abandon neither the idealism of his youth nor his love for Vic's sister Deepa. But neither the idealism of the one nor the passive cynicism of the other can avert the tragedies that await them. The In-Between World of Vikram Lall is a profound and careful examination of one man's search for his place in the world, with themes that have run through Vassanji's work: the nature of community in a volatile society, the relations between colony and colonizer, and the inescapable presence of the past. It is also, finally, a deeply personal book speaking to the people who are in the in-between.

In 1940 the world was on a knife-edge. The hurricane of events that marked the opening of the Second World War meant that anything could happen. For the aggressors there was no limit to their ambitions; for their victims a new Dark Age beckoned. Over the next few months their fates would be determined. In *Fateful Choices* Ian Kershaw re-creates the ten critical decisions taken between May 1940, when Britain chose not to surrender, and December 1941, when Hitler decided to destroy Europe's Jews, showing how these choices would recast the entire course of history.

This book describes the fundamentals of particle detectors as well as their applications. Detector development is an important part of nuclear, particle and astroparticle physics, and through its applications in radiation imaging, it paves the way for advancements in the biomedical and materials sciences. Knowledge in detector physics is one of the required skills of an experimental physicist in these fields. The breadth of knowledge required for detector development comprises many areas of physics and technology, starting from interactions of particles with matter, gas- and solid-state physics, over charge transport

and signal development, to elements of microelectronics. The book's aim is to describe the fundamentals of detectors and their different variants and implementations as clearly as possible and as deeply as needed for a thorough understanding. While this comprehensive opus contains all the materials taught in experimental particle physics lectures or modules addressing detector physics at the Master's level, it also goes well beyond these basic requirements. This is an essential text for students who want to deepen their knowledge in this field. It is also a highly useful guide for lecturers and scientists looking for a starting point for detector development work.
