Since birth, you've wanted to discover things. You started out by putting every available object in your mouth. Later you began asking the grownups all those "why" questions. None of this makes you unique -- humans are naturally curious animals. What's unusual is that you've decided to take a physics course. There are easier ways to satisfy a science requirement, so evidently, you're one of those uncommon people who has retained the habit of curiosity into adulthood, and you're willing to tackle a subject that requires sustained intellectual effort. Bravo!

THE week between the time Mary Jane heard of the trip South and the time for starting seemed unusually short. So short that Mary Jane thought it surely must have had only three days in it--that is, she thought that till she counted up and found to her surprise that this very, very short week had had Wednesday, Thursday, Friday, Saturday, Sunday, Monday and now a Tuesday just exactly as all other weeks have. "But the days haven't been the same, Alice, I just know they haven't," insisted the little girl. "Yes they have," laughed Alice, "only you've had so much to do and so much fun that you haven't noticed how many hours have gone by--that's the difference." "I should say we have done lots," said Mary Jane, "if that's the matter. I never saw such lots to do--never!"

Exploring Creation with Chemistry and Physics

The Cambridge Lower Secondary Complete Chemistry Student Book builds a solid foundation in Lower Secondary Chemistry through a rigorous, separate science approach and develops the skills students need to prepare them for the step up to IGCSE. This resource fully covers the curriculum and prepares students for a smooth transition to IGCSE Chemistry. Written by Philippa Gardom-Hulme, author of our previous successful edition, this book provides an international approach that maintains the strengths of the previous edition, with updates and improvements to better meet students' needs. The Student Book is supported by a Workbook that provides opportunities for independent practice inside and outside the classroom, and a Teacher Handbook, which offers full teaching support.
