Point and Figure charts are one of the great secrets of the Technical Analysis world. Highly sophisticated and with a thoroughbred pedigree, they can, however, be overlooked by traders today. Jeremy du Plessis - one of the foremost Point and Figure experts in the world - returns with a fully updated second edition of this definitive guide in an effort to redress this imbalance. This second edition, with an extensive revision to the text and introduction of brand new techniques, demystifies the world of Point and Figure charting. It includes a detailed explanation of the history and development of the technique from its invention to the modern day, and covers the makeup

of the chart patterns, why they are created, and how to interpret them. Throughout, readers are encouraged to understand Point and Figure charts from first principles, rather than just remember the names of a series of patterns. Further, the explanation of how to use Point and Figure charts to project targets and calculate risk-reward ratios is the most comprehensive ever seen. Also featured in the second edition are: - A step-by-step analysis of the FTSE 100 Index using the 3-box method, as well as the NASDAQ

Composite Index, using the 1-box method - A detailed discussion of optimising techniques - An in-depth chapter on Analysing Point and Figure charts, extensively rewritten from the first edition - A new explanation of how Point and Figure parameters are chosen and the implications of choosing them - Two new Point and Figure construction methods never seen before - Point and Figure's contribution to market breadth, with a look at bullish percent and two brand new indicators - Full discussion of Point and Figure gaps and how they provide valuable information about the chart - Lesser known, more advanced techniques such as the use of moving averages, parabolic SAR and Bollinger Bands on Point and Figure

charts - Price and volume activity histograms and how they provide information about support and resistance All this is illustrated with numerous colour charts and observations from years of trading experience.
