This is not your standard sex book. What is it about the top tech product companies such as Amazon, Apple, Google, Netflix and Tesla that enables their record of consistent innovation? Most people think it's because these companies are somehow able to find and attract a level of talent that makes this innovation possible. But the real advantage these companies have is not so much who they hire, but rather how they enable their people to work together to solve hard problems and create extraordinary products. As legendary Silicon Valley coach--and coach to the founders of several of today's leading tech

companies--Bill Campbell said, "Leadership is about recognizing that there's a greatness in everyone, and your job is to create an environment where that greatness can emerge." The goal of EMPOWERED is to provide you, as a leader of product management, product design, or engineering, with everything you'll need to create just such an environment. As partners at The Silicon Valley Product Group, Marty Cagan and Chris Jones have long worked to reveal the best practices of the most consistently innovative companies in the world. A natural companion to the bestseller INSPIRED, EMPOWERED tackles head-on the reason why most companies fail to truly leverage the potential of their people to innovate: product leadership. The book covers: what it means to be an empowered product team, and how this is different from the "feature teams" used by most companies to build technology products recruiting and coaching the members of product teams, first to competence, and then to reach their potential creating an inspiring product vision along with an insights-driven product strategy translating that strategy into action by empowering teams with specific objectives--problems to solve--rather than features to build redefining the relationship of the product teams to the rest of the company detailing the changes necessary to effectively and successfully transform your organization to truly empowered product teams EMPOWERED puts decades of lessons learned from the best leaders of the top technology companies in your hand as a guide. It shows you how to become the leader your team and company needs to not only survive but thrive.

In 1940, the historian Emanuel Ringelblum established a clandestine organization, code named Oyneg Shabes, in Nazi-occupied Warsaw to study and document all facets of Jewish life in wartime Poland and to compile an archive that would preserve this history for posterity. As the Final Solution unfolded, although decimated by murders and deportations, the group persevered in its work until the spring of 1943. Of its more than 60 members, only three survived. Ringelblum and his family perished in March 1944. But before he died, he managed to hide thousands of documents in milk cans and tin boxes. Searchers found two of these buried caches in 1946 and 1950. Who Will Write Our History tells the gripping story of Ringelblum and his determination to use historical scholarship and the collection of documents to resist Nazi oppression.

In the seven years since the first edition of this book was published there have been many important developments in knowledge of neuromuscular diseases. These are reflected in this new edition. We have

taken the opportunity to add much new clinical and scientific material to the book, particularly in relation to metabolic myopathies and neuropathies, and to include more information on genetic aspects of neuromuscular diseases, quantitative electromyographic techniques, plexus and root lesions and cardiomyopathies. The aim of the book remains unchanged, but we have rearranged some of the material so that there are several new chapters. The illustrations have also been extensively revised and there are many new references. We hope that it will continue to provide a convenient source of practical and theoretical information that will not only be useful in managing patients with neuromuscular diseases, but will stimulate research. London, May 1987 Michael Swash Martin S. Schwartz Preface to the First Edition Neuromuscular diseases are common in clinical practice. Patients with these disorders may be referred to neurologists, rheumatologists, orthopaedic surgeons, paediatricians or to general physicians, and their investigation, utilising electromyography (EMG) and muscle biopsy, often requires the help of the clinical neurophysiologist and of the pathologist.

#1 NEW YORK TIMES BESTSELLER • A special 25th anniversary edition of the beloved book that changed millions of lives—with a new afterword by the author "A wonderful book, a story of the heart told by a writer with soul." —Los Angeles Times Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

Distinguished literary scholar Geoffrey H. Hartman, himself forced to leave Germany at age nine, collects his essays, both scholarly and personal, that focus on the Holocaust. Hartman contends that although progress has been made, we are only beginning to understand the horrendous events of 1933 to 1945. The continuing struggle for meaning, consolation, closure, and the establishment of a collective memory against the natural tendency toward forgetfulness is a recurring theme. The many forms of response to the devastation - from historical research and survivors' testimony to the novels, films, and monuments that have appeared over the last fifty years - reflect and inform efforts to come to grips with the past, despite events (like those at Bitburg) that attempt to foreclose it. The stricture that poetry after Auschwitz is ""barbaric"" is countered by the increased sense of responsibility incumbent on the creators of these works.
