Assembly Springer

In this book, experts discuss whether volatility, uncertainty, complexity and ambiguity (VUCA) represent a challenge or a business opportunity. More intense debates on global climate change, increased turbulence in financial quarters, increased job insecurity and high levels of stress at the workplace are attracting attention in the context of organization behavior and entrepreneurship. Fear and confusion have become part and parcel of business, often undermining trust, cooperation and inspiration. As a response, a new way of organizing self-management has emerged. The book combines practical wisdom from East and West, to develop integrative self-management theory and practice; provides direction to support an integrative mind-set, integrative organization and integrative leadership; and presents VUCA as an opportunity and necessity for development and growth, rather than a threat.

This book, divided in two volumes, originates from Techno-Societal 2020: the 3rd International Conference on Advanced Technologies for Societal Applications, Maharashtra, India, that brings together faculty members of various engineering colleges to solve Indian regional relevant problems under the guidance of eminent researchers from various reputed organizations. The focus of this volume is on technologies that help develop and improve society, in particular on issues such as advanced and sustainable technologies for manufacturing processes, environment, livelihood, rural employment, agriculture, energy, transport, sanitation, water, education. This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region. On the other hand, technologies proposed by expert researchers may find applications in different regions. This offers a multidisciplinary platform for researchers from a broad range of disciplines of Science, Engineering and Technology for reporting innovations at different levels.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing

cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

Rural Marketing Springer Science & Business Media

Human resource management in the armed forces is a vital issue because its strength has always been the soldier. This monograph analyses the challenges of HRM in the armed forces with specific focus on transition of soldiers to a second career, as service personal retire at a comparatively young age when their personal responsibilities are at the peak. The monograph first contextualises the key drivers which impact a soldiers' life while in service, his early exit and the issue of transition. Next, it examines the challenges which impede transition and why absorption in various government departments/PSUs/banks, etc., is not materialising in spite of reservations and agencies to monitor the same. It further analyses veteran affairs in a few foreign armies to identify takeaways suited in the Indian socio-economic environment. Finally, it outlines pragmatic recommendations for transition of soldiers to a suitable second career in the civil domain.

War Is a Racket is a famous anti-war book written by retired Major General Smedley Buter. In the book, Butler discusses how businesses profit from conflict.

[Encyclopedia of Lifestyle Medicine and Health](#) Pearson Education India

This book examines the problem of managing the flow of materials into, through, and out of a system in order to improve the efficiency and effectiveness of materials management. The subject is crucial for global competitive advantage, as materials constitute the largest single cost factor in manufacturing and service, and their effective management enhances value for money. In this context, inventory is a barometer of materials management effectiveness, along with wastage of materials. The book adopts a comprehensive, integrated systems approach and covers almost all aspects of materials, considering the specification, procurement, storage, handling, issue, use and accounting of materials to get the most out of every dollar invested. Combining conceptual clarity and quantitative rigor, it will be a highly useful guide for practicing managers, academics and researchers in this vital functional area.

Motor Auto Repair Manual Springer Science & Business Media

"Fresh and diverting, informative and topical." – Australian Financial Review, Best Books of the Year Night, Sleep, Death and the Stars by Lauren Groff? The Universe Underground by Paolo Giordano? We All Hated Each Other So Much by Frank Westermann?Plus: discovering new planets and destroying satellites; returning to the Moon (this time to stay); the Mars delusion; the hunt for extra-terrestrial life, and much more... In the 1960s, the rivalry between the superpowers brought us into space, adding a whole new dimension to human life. The last frontier was open: between 1969 and 1972 twelve men (but no women) walked on the moon. No one has since. The space race revealed itself for what it really was: a political and military competition. Space agencies, however, have not been idle and the exploration of the solar system has continued with probes and robots. Without politics, science has thrived. But the lack of government funding has opened space exploration to the forces of capitalism: the race has started again, with different rules and different players. For those of us who remain on Earth, space offers a spiritual dimension, and the search for answers to age-old questions. Colonizing Mars might not be the solution to humanity's problems, but the promise of space—whether expressed in a tweet by Elon Musk or a photo taken by a NASA rover on Mars—keeps proving irresistible.

Techno-Societal 2020 Europa Editions UK

Presenting sufficient theory to ensure a sound understanding of basic concepts, this progressive book provides a fundamental, yet comprehensive exploration of total quality management (TQM) in an all-encompassing, single-volume review that covers not only the principles and practices, but also the tools and techniques. The volume covers principles and practices of quality management, and outlines tools and techniques such as benchmarking, information technology, quality management systems, environmental management systems, quality function deployment, quality by design, products liability, process control and Taguchi's quality engineering. For quality management professionals and trainers.

This textbook covers the fundamentals of organizational development and change (ODC) theory while offering a comprehensive, structured, and systematic approach to guide change management strategies at the organization level. It provides an in-depth understanding of and the

tools necessary for designing, diagnosing, implementing and evaluating organizational change interventions. Students will be exposed to case studies in ODC from selected international and Caribbean/Latin American organizations, demonstrating ODC in practice across a broad geographical context. This textbook, the first to offer a macro-level perspective of ODC, provides students with the tools needed to be successful in implementing change into today's organizations.

A Guide for Delineation of Lymph Nodal Clinical Target Volume in Radiation Therapy Harper Collins

An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. PrahaladThe targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.
