This book includes novel and state-of-the-art research discussions that articulate and report all research aspects, including theoretical and experimental prototypes and applications that incorporate sustainability into emerging applications. In recent years, sustainability and information and communication technologies (ICT) are highly intertwined, where sustainability resources and its management has attracted various researchers, stakeholders, and industrialists. The energy-efficient communication technologies have revolutionized the various smart applications like smart cities, healthcare, entertainment, and business. The book discusses and articulates emerging challenges in significantly reducing the energy consumption of communication systems and also explains development of a sustainable and energy-efficient mobile and wireless communication network. It includes best selected high-quality conference papers in different fields such as internet of things, cloud computing, data mining, artificial intelligence, machine learning, autonomous systems, deep learning, neural networks, renewable energy sources, sustainable wireless communication networks, QoS, network sustainability, and many other related areas.

'There's no business like the car business!' Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for – and then developed and manufactured in – India, the 'Sunshine Car' has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the

unforgettable marketing campaigns that made all the difference – and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.

Santro Europa Editions UK "Fresh and diverting, informative and topical." — Australian Financial Review, Best Books of the Year Night, Sleep, Death and the Stars by Lauren Groff? The Universe Underground by Paolo Giordano? We All Hated Each Other So Much by Frank Westermann?Plus: discovering new planets and destroying satellites; returning to the Moon (this time to stay); the Mars delusion; the hunt for extra-terrestrial life, and much more... In the 1960s, the rivalry between the superpowers brought us into space, adding a whole new dimension to human life. The last frontier was open: between 1969 and 1972 twelve men (but no women) walked on the moon. No one has since. The space race revealed itself for what it really was: a political and military competition. Space agencies, however, have not been idle and the exploration of the solar system has continued with probes and robots. Without politics, science has thrived. But the lack of government funding has opened space exploration to the forces of capitalism: the race has started again, with different rules and different players. For those of us who remain on Earth, space offers a spiritual dimension, and the search for answers to age-old questions. Colonizing Mars might not be the solution to humanity's problems, but the promise of space—whether expressed in a tweet by Elon Musk or a photo taken by a NASA rover on Mars—keeps proving irresistible.

An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. PrahaladThe targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of thecompany, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

The executive, the legislature and the judiciary are the three branches of government, both state and central, in India. Of these, it is the judiciary's task to uphold constitutional values and ensure justice for all. The interpretation and application of constitutional values by the judicial system has had far-reaching impact, often even altering provisions of the Constitution itself. Although our legal system was originally based on the broad principles of the English common law, over the years it has been adapted to Indian traditions and been changed, for the better, by certain landmark verdicts. In Landmark Judgments that Changed India, former Supreme Court judge and eminent jurist

Asok Kumar Ganguly analyses certain cases that led to the formation of new laws and changes to the legal system. Discussed in this book are judgments in cases such as Kesavananda Bharati v. State of Kerala that curtailed the power of Parliament to amend the Constitution; Maneka Gandhi v. Union of India and Others that defined personal liberty; and Golaknath v. State of Punjab, where it was ruled that amendments which infringe upon fundamental rights cannot be passed. Of special significance for law students and practitioners, this book is also an ideal guide for anyone interested in the changes made to Indian laws down the years, and the evolution of the judicial system to what it is today.

Motorbooks International Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maximi *Hood Fu* Cashaddicts Publishing

Communication has evolved over the years. Face-to-face interactions of the past have given way to technology-driven channels of communication in present times. Communication audit, crisis communication, financial communication, communication beyond boundaries, and corporate communication are the new buzzwords in the language of business. The second edition of Business Communication for Managers, aimed at all MBA students, begins by briefly analysing the various theories of communication. It demonstrates methods of effective communication through examples, real-life scenarios, and role-plays. It adopts a multi-dimensional and integrative approach to solve communication dilemmas at the workplace and touches upon the thoughts related to attention, perception, empathy, and professionalism
