An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. Prahalad
The targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a

suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

This book presents theories and case studies for corporations in developed

nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

There's no business like the car business! Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for India, the "Sunshine Car" has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.

An authentic, heartfelt and compelling narrative – straight from the horse's mouth – that reveals for the first time numerous unknown aspects of the life and times of one of the greatest legends of all time who stands out as a symbol of secular India. Dilip Kumar (born as Yousuf Khan), who began as a diffident novice in Hindi cinema in the early 1940s, went on to attain the pinnacle of stardom within a short time. He came up with spellbinding performances in one hit film after another – in his almost six-

decade-long career – on the basis of his innovative capability, determination, hard work and never-say-die attitude. In this unique volume, Dilip Kumar traces his journey right from his birth to the present. In the process, he candidly recounts his interactions and relationships with a wide variety of people not only from his family and the film fraternity but also from other walks of life, including politicians. While seeking to set the record straight, as he feels that a lot of what has been written about him so far is 'full of distortions and misinformation', he narrates, in graphic detail, how he got married to Saira Banu, which reads like a fairy tale! Dilip Kumar relates, matter-of-factly, the event that changed his life: his meeting with Devika Rani, the boss of Bombay Talkies, when she offered him an acting job. His first film was Jwar Bhata (1944). He details how he had to learn everything from scratch and how he had to develop his own distinct histrionics and style, which would set him apart from his contemporaries. After that, he soon soared to great heights with movies such as Jugnu, Shaheed, Mela, Andaz, Deedar, Daag and Devdas. In these movies he played the tragedian with such intensity that his psyche was adversely affected. He consulted a British psychiatrist, who advised him to switch over to comedy. The result was spectacular performances in laugh riots such as Azaad and Kohinoor, apart from a scintillating portrayal as a gritty tonga driver in Naya Daur. After a five-year break he started his 'second innings' with Kranti (1981), after which he appeared in a series of hits such as Vidhaata, Shakti, Mashaal, Karma, Saudagar and Qila.

This Independence Day edition of The World is Flat 3.0 includes an exclusive preview of That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller "One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in The New York Times reviewing The World Is Flat in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on

the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. The World Is Flat 3.0 is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of The Lexus and the Olive Tree.

When The Accidental Prime Minister was published in 2014, it created a storm and became the publishing sensation of the year. The Prime Minister 's Office called the book a work of 'fiction', the press hailed it as a revelatory account of Prime Minister Manmohan Singh 's first term in UPA. Written by Singh 's media adviser and trusted aide, the book describes

Singh 's often troubled relations with his ministers, his cautious equation with Sonia Gandhi and how he handled the big crises from managing the Left to pushing through the nuclear deal.

Insightful, acute and packed with political anecdotes, The Accidental Prime Minister is one of the great insider accounts of Indian political life. Never Far Away Macmillan

"This 96-page report documents the coercive nature of manual scavenging. Across India, castes that work as "manual scavengers" collect human excrement on a daily basis, and carry it away in cane baskets for disposal. Women from this caste usually clean dry toilets in homes, while men do the more physically demanding cleaning of sewers and septic tanks. The report describes the barriers people face in leaving manual scavenging, including threats of violence and eviction from local residents but also threats, harassment, and unlawful withholding of wages by local officials."--Publisher's website.
