Following his well-received books in this ' In Detail ' series on the Ferguson TE20 and the Massey Ferguson 35 & 65 models, author Michael Thorne turns his attention to the outstandingly successful and well-loved 100 Series of tractors. Of the 100 range, the most popular was and remains the 135. Half a million 135s were built at Massey Ferguson ' s factory in Coventry alone, with production overseas on top of this figure. Another big success was the larger, more powerful 165, with nearly 200,000 sold. This model, like the 135, is among the most popular and sought-after classic tractors today, although many 135s and 165s are still in active use around the world, in spite of their age. The 100 range included a great number of other models, and in addition to the 135 and 165, which are given in-depth treatment here, important models described in detail are the 130, 148 Super-Spec, 168, 175, 185 and 188 Super-Spec. There is an extensive chapter on the implements available for the range, and another on conversions. Featuring 290 illustrations including detailed specially-commissioned colour photography of outstanding examples of 100 Series tractors, Massey Ferguson 100 Series In Detail offers an unrivaled store of knowledge for the owners and enthusiasts who care passionately about these tractors, and serves as a tribute to the people who made them.

Roads and Road Construction La Fabrica

This book explores the evolution of surrealism, from its roots in art history to the birth of the movement in the 1920s. Published to coincide with the exhibition of the same name at the Fundacion Juan March in Madrid (Oct 2013 - Jan 2014),

Surrealist Before Surrealism brings together more than 200 drawings, prints, photographs, books and magazines, ranging from the late Middle Ages through to the Surrealist movement. The show follows the path set out by the legendary exhibition "Fantastic Art, Dada, Surrealism", organized 75 years ago by the founding Director of the Museum of Modern Art in New York, Alfred H. Barr, in which he provided a genealogy of Surrealism by juxtaposing, for the first time, the work of contemporary artists with that of Hieronymus Bosch, Giuseppe Arcimboldo, Giovanni Battista Piranesi, William Hogarth, Francisco de Goya and Grandville among others. Undoubtedly, the artistic sensibility of the Surrealist artists, as well as their preferred working methods, led them to fix their collective gaze upon the long tradition of the art of subjectivity, from the late medieval era, to the Mannerist and Baroque periods, through to modernity.
