Despite popular forays into augmented and virtual reality in recent years, spatial computing still sits on the cusp of mainstream use. Developers, artists, and designers looking to enter this field today have few places to turn for expert guidance. In this book, Erin Pangilinan, Steve Lukas, and Vasanth Mohan examine the AR and VR development pipeline and provide hands-on practice to help you hone your skills. Through step-by-step tutorials, you'll learn how to build practical applications and experiences grounded in theory and backed by industry use cases. In each section of the book, industry specialists, including Timoni West, Victor Prisacariu, and Nicolas Meuleau, join the authors to explain the technology behind spatial computing. In three parts, this book covers: Art and design: Explore spatial computing and design interactions, human-centered interaction and

sensory design, and content creation tools for digital art  
Technical development: Examine differences between ARKit, ARCore, and spatial mapping-based systems; learn approaches to cross-platform development on head-mounted displays  
Use cases: Learn how data and machine learning visualization and AI work in spatial computing, training, sports, health, and other enterprise applications

As video becomes an important tool to expose injustice, an examination of how human rights organizations are seeking to professionalize video activism. Visual imagery is at the heart of humanitarian and human rights activism, and video has become a key tool in these efforts. The Saffron Revolution in Myanmar, the Green Movement in Iran, and Black Lives Matter in the United States have all used video to expose injustice. In *Seeing Human Rights*, Sandra Ristovska examines how human rights organizations are seeking to professionalize video activism through video production, verification standards, and training. The result, she argues, is a proxy profession that uses human rights videos to tap into journalism, the law, and political advocacy. Ristovska explains that this proxy profession retains some tactical flexibility in its use of video while giving up on the more radical potential and imaginative scope of

---

video activism as a cultural practice. Drawing on detailed analysis of legal cases and videos as well as extensive interviews with staff members of such organizations as Amnesty International, Human Rights Watch, WITNESS, the International Criminal Tribunal for the former Yugoslavia (ICTY), and the International Criminal Court (ICC), Ristovska considers the unique affordances of video and examines the unfolding relationships among journalists, human rights organizations, activists, and citizens in global crisis reporting. She offers a case study of the visual turn in the law; describes advocacy and marketing strategies; and argues that the transformation of video activism into a proxy profession privileges institutional and legal spaces over broader constituencies for public good.

Courtesy of watching his mom's relationships, Sebastian Hawkins knows what girls need to do to get a guy. He has what he considers a PHD in hooking up. When he needs extra cash for a car, Sebastian starts up an online venture as *The Hook-up Doctor*, to anonymously help girls land the guy of their dreams. Of course, his services don't offer a happily-ever-after guarantee. He's seen firsthand getting together never means staying together. And then he falls in love... With the last girl he would expect... Totally not in his game plan. Suddenly, Sebastian finds himself muddled in the game he's always prided himself on. He can't even pick up girls at parties anymore! Why would anyone want to be in love when it turns you into a stuttering, screwed-up, mess with really lame stalker tendencies? Stalking? Totally not his gig. But the *Hook-up Doctor* won't let himself go down easily. He's always known how to give a girl what she wants and now it's time to figure out what a boy wants... and he definitely plans on getting it. A companion novel to *What a*

To solve the attempted murder, the detective on the scene must first solve an actual murder. Before Rorschach and Laura can carry out their ill-fated plan to kill a presidential candidate, they first have to find a way into his political rally. Once that detail is uncovered, the rest should snap into place- especially if it turns out that their inside man was part of the rival campaign. The only problem is that man is dead, potentially killed by the very people he was trying to help, and as everyone knows, dead men tell no tales. Thank goodness, then, that crime scenes do! There ' s only one more issue to go after this. Don ' t miss out on one of the most intriguing comics of the year!

The Five Forces That Change Everything  
BenBella Books

In this piercing and unforgettable memoir, the award-winning poet reflects on a year of turbulence, fear, and hope. For acclaimed British-Guyanese writer Fred D ' Aguiar, 2020 was a year of personal and global crisis. The world around him was shattered by the impact of the Covid-19 pandemic, Black Lives Matter protests erupted across the United States, California burned, and D ' Aguiar was diagnosed with stage 4 cancer. Year of Plagues is an intimate, multifaceted exploration of these seismic events.

Combining personal reminiscence and philosophy, D ' Aguiar confronts profound questions about the purpose of pursuing a life of writing and teaching in the face of overwhelming upheavals; the imaginative and artistic strategies a writer can bring to bear as his sense of self and community are severely tested; and the quest for strength and solace necessary to help forge a better future. Drawn from two cultural perspectives—his Caribbean upbringing and his American lifestyle—D ' Aguiar ' s beautiful and challenging memoir is a paean of resistance to despotic authority and life-threatening disease. In his first work of nonfiction, D ' Aguiar subverts the traditional memoir with highly charged language that shifts from the lyrical to the quotidian, from the metaphysical to the personal. While his experience could not be darker, its rendering is tinged with light and joy, captured in prose that unfolds in wonderful, unexpected ways. Both tender and ferocious, Year of Plagues is a harrowing yet uplifting genre-bending

memoir of existence, protest, and survival.

It has been approximately 40 years since these articles have been written. Many of the truths in them are not being taught today. You will find some of them in certain books compiled by Elijah Muhammad and then others may surface every now and then in photocopy or a citing here and there. In any case, these articles represent those submitted to various new organs of the early 50's and 60's. Some of these newspapers are no longer in business and others have simply gone through economic and social change prompting them to change their name and management. In the early days, when there was no Muhammad Speaks newspaper, which had become the official newspaper of the Nation of Islam, Elijah Muhammad submitted articles to various local papers for publication. Some of these newspapers were the Herald Dispatch, Amsterdam News, The Crusader and the Pittsburgh Courier. In various instances, after submitting articles, the Brotherhood of the Fruit of Islam (FOI) would begin distributing the papers in an effort to get the articles in Black people's hand. The sharp increase in distribution produced leverage with the paper that gave an "insurance" that the Messenger would be published. It was due to the Nation of Islam's distribution of many of these papers that pushed it into the status of mainstream in the black community. Previously, these tabloids were no more than nickel and dime shopper guides. Some of these articles are included in parts of Elijah Muhammad's books, as pointed out in their respective acknowledgements, making it clear that all of his books are actual compilations of previous speeches, articles and lectures. Considering the Messenger is one of the most prolific writers of our time, many of his articles were

---

not included in his standard books. This work fell to those of us who understand that the guidance we need in his absence is in his literature. This is nothing new to those who mind. Our motivation for publishing these articles is simple. There are many truths that Messenger Elijah Muhammad taught that are not available today. We, therefore, are rising to the occasion to satisfy this vacuum. "In the absence of the Trainer, the training will rise up and meet the occasion." We trust that if the reader reads something he or she has read before, it will only enhance their knowledge base. There, however, are many items that will be fairly new to you. We hope that whatever experience one has, it will be one that benefits our nation and in this way, regardless of when or if you have read it, you will act upon the principle contained herein. For as Elijah Muhammad, Messenger of Allah, said, "Mere belief counts for nothing, unless carried into practice." Nasir Makr Hakim Minister of Elijah Muhammad, Messenger of Allah

The Essential Guide to Critical Development Studies provides an up-to-date and authoritative introduction to the field, challenging mainstream development discourse and the assumptions that underlie it. Critical development studies lays bare the economic, political, social, and environmental crises that characterise the current global capitalist system, proposing instead systemic change and different pathways for moving beyond capitalism into a new world of genuine progress where economic and social justice and ecological integrity prevail. In this book, the authors challenge market-driven, neoliberal development agendas, incorporating analyses of class, gender, race, and the dynamics of uneven capitalist development. This

thoroughly revised and expanded second edition includes:

- 18 new chapters, including on topics such as philanthrocapitalism, race, the energy transition, Indigenous resistance and resilience, and global health
- Expanded global coverage, including new chapters on South Africa, North Africa, and the Gulf Arab states
- A new section on resistance and alternatives
- Additional pedagogical features, including a glossary of key terms, discussion questions, and expanded guides for further reading.

This textbook will be essential reading for students of global development, political science, sociology, economics, gender studies, geography, history, anthropology, agrarian studies, international political economy, and area studies. It will also be an important resource for development researchers, practitioners, and policymakers.

“ Full of fascinating insights drawn from an impressive range of disciplines, *The Ascent of Information* casts the familiar and the foreign in a dramatic new light. ” —Brian Greene, author of *The Elegant Universe*

Your information has a life of its own, and it ’ s using you to get what it wants. One of the most peculiar and possibly unique features of humans is the vast amount of information we carry outside our biological selves. But in our rush to build the infrastructure for the 20 quintillion bits we create every day, we ’ ve failed to ask exactly why we ’ re expending ever-increasing amounts of energy, resources,

---

and human effort to maintain all this data. Drawing on deep ideas and frontier thinking in evolutionary biology, computer science, information theory, and astrobiology, Caleb Scharf argues that information is, in a very real sense, alive. All the data we create—all of our emails, tweets, selfies, A.I.-generated text and funny cat videos—amounts to an aggregate lifeform. It has goals and needs. It can control our behavior and influence our well-being. And it ' s an organism that has evolved right alongside us. This symbiotic relationship with information offers a startling new lens for looking at the world. Data isn ' t just something we produce; it ' s the reason we exist. This powerful idea has the potential to upend the way we think about our technology, our role as humans, and the fundamental nature of life. *The Ascent of Information* offers a humbling vision of a universe built of and for information. Scharf explores how our relationship with data will affect our ongoing evolution as a species. Understanding this relationship will be crucial to preventing our data from becoming more of a burden than an asset, and to preserving the possibility of a human future.

Old Plymouth: A Guide to Its Localities and Objects of Interest HarperCollins Australia

An invitation to return to a simpler time of earth-based spirituality and ritual living, through writings from a small forest-farm in the Appalachian Highlands. This book looks at the agricultural year as a starting space for a deepening of earth-centered spirituality. It gives a set of backstories to ease the reader into a time between the pre-industrial era and the modern one, into a place where the fast-moving stress of American life can be affected by a better connection not only to the natural world but to the elegant expression of the year as expressed through seasonal festivals and celebrations. The chapters are broken into four seasons, with the

quarter days a highlight within each, and feature simple skills that accompany each marker in the year. Author H. Byron Ballard offers advice on spiritual and physical immersion into the seasons that applies to readers from all areas: rural, urban, and suburban. This is also a deeply practical book, including insights into the following: Farming & gardening: composting, manure, soil preparation, pests, seed-saving Food: cooking, preserving, foraging, the summer kitchen, mushrooms and mycelium Fiber arts: knitting, crocheting, spinning, weaving, decorative cut-work, and embroidery Sewing: treadle machines, electric machines, hand sewing Household crafts: candle-making, soap-making, broom-making, sharpening tools Health: medicines, tending the dying, death and death rituals A glossary is included for any unfamiliar terms.
