The Generalist Approach to Conflict Resolution Routledge

"This book argues that the field of peace and conflict needs a stronger and more practical sense of its ethical obligations. By focusing on the ethical dilemmas in peace work it aims to reckon with recent questions among those involved in mediating conflict, from international peacekeepers to social justice activists. For example, it argues against posing false binaries between domestic and international issues and against viewing violence and conflict as the same. It holds up strategic nonviolence to critical scrutiny and shows that "do no harm" approaches may in fact do harm. The chapters cover the role of violence in conflict; conflict and violence prevention and resolution; humanitarianism; human rights advocacy; transitional justice; political reconciliation; and peace education and pedagogy, among other topics"--

The Anatomy of Peace Global Collective Publishers

This book introduces Root Narrative Theory, a new approach for narrative analysis, decoding

moral politics, and for building respect and understanding in conditions of radical disagreement. This theory of moral politics bridges emotion and reason, and, rather than relying on what people say, it helps both the analyst and the practitioner to focus on what people mean in a language that parties to the conflict understand. Based on a simple idea—the legacy effects of abuses of power—the book argues that conflicts only endure and escalate where there is a clash of interpretations about the history of institutional power. Providing theoretically complex but easy-to-use tools, this book offers a completely new way to think about storytelling, the effects of abusive power on interpretation, the relationship between power and conceptions of justice, and the origins and substance of ultimate values. By locating the source of radical disagreement in story structures and political history rather than in biological or cognitive systems, Root Narrative Theory bridges the divides between reason and emotion, realism and idealism, without losing sight of the inescapable human element at work in the world's most devastating conflicts. This book will be of much interest to students of conflict resolution, peace studies and International Relations, as well as to practitioners of conflict resolution.

Understanding Conflict Resolution Columbia University Press

Even though international peacebuilding has

rapidly expanded in the last two decades to respond to more multi-faceted and complex conflicts, the field has lagged behind in documenting the impact and success of projects. To help address this gap, the Alliance for Peacebuilding, one of the leading networks in the field, has brought together 13 stories of innovative peacebuilding practices from around the world in *Building Peace*. While the projects covered are diverse in nature, together they demonstrate the significant impact of peacebuilding work. Contributors created new institutions to prevent and manage conflicts at the local or national levels, helped restore relationships in conflict-affected communities, and empowered citizens to work for positive change in their societies across ethnic, religious, and political divides. It's clear that there is no quick fix for violence but this volume will go a long way in providing inspiration and practical tools for policymakers, academics and practitioners who seek to make significant and valuable contributions towards achieving peace.

DIY Conflict Resolution: Seven Choices and Five Actions of a Master Lexington Books

Some churches struggle with attacks from without, while others must deal with threats from within. Dr. Greg Tyree's book is a welcome contribution to this subject, because conflict often hinders churches from reaching their glorious potential. Those who observe churches point to a number of issues that threaten their existence. Some suggest the main threat is materialism, while others blame secularism. Still others tell us that churches are in jeopardy because of doctrinal drift. I contend that churches are frequently endangered because those who lead can't handle conflict efficiently. Jesus said, "By this all will know that you are My disciples, if you love for one another" (John 13.35, NKJV). Your ability to love the brethren is the most convincing proof you are a disciple, and this is the reason that Greg's book is so important. Greg does not direct others while sitting in a command center far from the battlefield. He labors in the turbulent

world of turning churches around. This gives his book an air of authenticity. He knows how to grow healthy churches and understands that handling conflict is one of the keys. As you read his book, you will discover what prevents many churches from reaching their God-given potential. You will learn how to turn negative situations into opportunities to glorify God. The Handbook of Conflict Resolution Oxford University Press

Conflict Resolution holds the promise of freeing approaches and policies with regard to politics of identity from the fatalistic grip of realism. While the conceptual literature on identity and conflicts has moved in this alternative direction, conflict resolution practice continues to rely on realist frames and acts as an unwanted auxiliary to traditional international relations. Perpetuation of conflict discourses, marginalization, and exclusion of affected populations are widespread. They are caused by the overreliance of conflict resolution practice on the binary frames of classic IR paradigms and also by the competitive and hierarchical relationships within the field. Philip Gamaghelyan relies on participatory action research and collective autoethnography to expose patterns of exclusion and marginalization as well as the paradoxical reproduction of conflict-promoting frames in current conflict-resolution practice applied to the Nagorno-Karabakh and Syrian crises. He builds on the work of postmodernist scholars, on reflective practice, and on discourse analysis to explore alternative and inclusive strategies with a transformative potential. The

IR discipline that has dominated policymaking is only one possible lens, and often a deficient one, for defining, preventing, or resolving contemporary conflicts wrapped in identity politics. Other conceptual frameworks can help to rethink our understanding of identity and conflicts and reconstruct them as performative and not static phenomena. These transformative frameworks are increasingly influential in the conflict resolution field and can be applied to policymaking. Violence Oxford University Press

In a world desperate to comprehend and address what appears to be an ever-enlarging explosion of violence, this book provides important insights into crucial contemporary issues, with violence providing the lens. Violence: Analysis, Intervention, and Prevention provides a multidisciplinary approach to the analysis and resolution of violent conflicts. In particular, the book discusses ecologies of violence, and micro-macro linkages at the local, national, and international levels as well as intervention and prevention processes critical to constructive conflict transformation. The causes of violence are complex and demand a deep

multidimensional analysis if we are to fully understand its driving forces. Yet in the aftermath of such destruction there is hope in the resiliency, knowledge, and creativity of communities, organizations, leaders, and international agencies to transform the conditions that lead to such violence.

This book uses a series of case studies to examine the roles played by universities during situations of conflict, peacebuilding and resistance. While a body of work dealing with the role of education in conflict does exist, this is almost entirely concerned with compulsory education and schooling. This book, in contrast, highlights and promotes the importance of higher education, and universities in particular, to situations of conflict, peacebuilding and resistance. Using case studies from Europe, Africa, Asia and the Middle East, this volume considers institutional responses, academic responses

and student responses, illustrating these in chapters written by those who have had direct experience of these issues. Looking at a university's tripartite functions (of research, teaching and service) in relation to the different phases or stages of conflict (pre conflict, violence, post conflict and peacebuilding), it draws together some of the key contributions a university might make to situations of instability, resistance and recovery. The book is organised in five sections that deal with conceptual issues, institutional responses, academic-led or discipline-specific responses, teaching or curriculum-led responses and student involvement. Aimed at those working in universities or concerned with conflict recovery and peacebuilding it highlights ways in which universities can be a valuable, if currently neglected, resource. This book will be of much interest to students of peace studies, conflict resolution, education studies and IR in general.

In real-life conflict resolution situations, one size does not fit all. Just as a mechanic does not fix every car with the same tool, the conflict resolution practitioner cannot hope to resolve every dispute using the same technique. Practitioners need to be comfortable with a wide variety of tools to diagnose different problems, in vastly different circumstances, with different people, and resolve these conflicts effectively.

The Conflict Resolution Toolbox gives you all the tools you need: eight different models for dealing with the many conflict situations you encounter in your practice. This book bridges the gap between theory and practice and goes beyond just one single model to present a complete toolbox - a range of models that can be used to analyze, diagnose, and resolve conflict in any situation. It shows mediators, negotiators, managers, and anyone needing to resolve conflict how to simply and effectively understand and assess the situations of conflict they face. And it goes a step further, offering specific, practical guidance on how to intervene to resolve the conflict successfully. Each model provides a different and potentially useful angle on the problem, and includes worksheets and a step-by-step process to guide the reader in applying the tools. Offers eight models to help you understand the root causes of any conflict. Explains each model's focus, what kind of situations it can be useful in and, most importantly, what interventions are likely to help. Provides you with clear direction on what specific actions to choose to resolve a

particular type of conflict effectively. Features a detailed case study throughout the book, to which each model is applied. Additional examples and case studies unique to each chapter give the reader a further chance to see the models in action. Includes practical tools and worksheets that you can use in working with these models in your practice. The Conflict Resolution Toolbox equips any practitioner to resolve a wide range of conflicts. Mediators, negotiators, lawyers, managers and supervisors, insurance adjusters, social workers, human resource and labour relations specialists, and others will have all the tools they need for successful conflict resolution.

Making Peace Oxford University Press

Dis-Solving Conflict from Within presents a new paradigm for looking at conflict. Written by a professional mediator (and an occasional adventure

motorcyclist), this book presents a mindfulness-based framework for understanding conflict, and more importantly, responding to conflict with strength, clarity, and ease as opposed to reacting to it with fear, avoidance, or aggression. The first part of the book takes the reader step by step through the method, drawing on famous teachings in both conflict resolution and mindfulness, real-life examples from the author's own practice, and colorful anecdotes from his personal adventures, which included riding a motorcycle across the Himalayas. The rest of the book is a very practical application for how these teachings can transform the way we live our lives - in conflicts ranging from arguments with your spouse and debates about current affairs at your dinner table to greater societal conflicts and existential challenges facing us. At once spiritually based, and yet also immensely practical, this book is relevant not just for conflict resolution professionals, but for anyone who wants to live more peacefully with the people around them. In a signature style that is both educational and funny - and always all his own - Henry

Yampolsky draws on his formal education, his life experiences, and his knowledge and acceptance that all people, no matter their beliefs, are infinitely connected. Distilling conflict down to our most basic needs as human beings leads the reader to the inevitable conclusion that we are not so different after all. While acknowledging the validity of the stories of conflicts created by humans, Yampolsky gently but firmly guides the reader to the same conclusion he has come to - that conflict can be transformed into an opportunity for growth, connection, and dialogue once we learn to turn within.

Resolving Conflict God's Way
Lexington Books

This in-depth analysis goes behind the headlines to understand why crucial negotiations fail. The author argues that diplomats often enter negotiations with flawed assumptions about human behavior, sovereignty, and power. Essentially, the international community is using a model of European diplomacy dating back to the 18th century to solve the complex problems of the 21st century. Through numerous examples, the author shows that the key failure in current diplomatic efforts is the entrenched belief that nations, through their representatives, will act rationally to further their individual political, economic, and strategic interests. However, the contemporary scientific understanding of how people act and see their world does not support this assumption. On the contrary, research from decision-making theory, behavioral economics, social neuropsychology, and current best practices in mediation indicate that emotional and irrational factors often have as much, if not more, to do with the success or failure of a mediated solution. Reviewing a wide range of conflicts and negotiations, Noll demonstrates that the best efforts of negotiators often failed because they did not take into account the deep-seated values and emotions of the disputing parties. In conclusion, Noll draws on his own long experience as a professional mediator to describe the process of building trust and creating a climate of empathy that is the key to successful negotiation and can go a long way toward resolving even seemingly intractable conflicts.
