The Handbook covers a broad range of topics including information on cooperation and competition, justice, trust development and repair, resolving intractable conflict, and working with culture and conflict. Comprehensive in scope, this new edition includes chapters that deal with language, emotion, gender, and personal implicit theories as they relate to conflict.

The Oxford Handbook of Peacebuilding, Statebuilding, and Peace Formation John Wiley & Sons

This book draws lessons and conclusions, based on the methodology outlined in the author's previous book, *Water as a Catalyst for Peace* (Routledge, 2013), and

further charts the course to a more practical framework for achieving regional stability and justice. Past agreements are examined and analysed, outlining the change along the way that occurred to the land and people of Palestine. The book is written with the intention of exposing past events that led to the current situation, evaluating the current state of the conflict in light of new circumstances and the reality on the ground. Viable options are explored to seek a practical and satisfactory negotiated settlement that ensures justice and viability. In conclusion, a roadmap for future direction is proposed to achieve equitable water allocation through proper negotiation between Israel and Palestine and to ultimately settle the conflict. Water resources allocation is at the heart of this pragmatic framework and roadmap.

Understanding Conflict Resolution Goodmedia Press

In a world desperate to comprehend and address what appears to be an ever-enlarging explosion of violence, this book provides important insights into crucial contemporary issues, with violence providing the lens. *Violence: Analysis, Intervention, and Prevention* provides a multidisciplinary approach to the analysis and resolution of violent conflicts. In particular, the book discusses ecologies of violence, and micro-macro linkages at the local, national, and international levels as well as intervention and prevention processes critical to constructive conflict transformation. The causes of violence are complex and demand a deep multidimensional analysis if we are to fully understand its driving forces. Yet in the aftermath of such destruction there is hope in

the resiliency, knowledge, and creativity of communities, organizations, leaders, and international agencies to transform the conditions that lead to such violence.

Examines the politics of expertise in the practices of peacemaking in post-civil war Lebanon Based on multi-sited ethnographic research centering on Beirut, but tracing international peace work as far as Switzerland and the United States, Master Peace examines the politics of expertise in the application of metropolitan theories of violence and practices of peacemaking in post-civil war Lebanon. Through ethnographic encounters, archival research, and interviews that shed light on the worlds of academic research, UN agencies, NGOs, and think tanks, Nikolas Kosmatopoulos argues that so-called experts, from violence researchers to peace professionals, have often misrepresented and exacerbated the violence they claim to be tackling, through their deployment of racialized tropes of conflict and communalizing peace practices. The assemblage of these tropes and practices, which Kosmatopoulos calls "master peace," naturalizes social and structural inequalities by collapsing them into supposedly innate cultural and sectarian divisions. Master peace installs unequal relations of domination through the work of metropolitan theories, as in "ethnic conflict" and "failed state," and practices, such as conflict resolution workshops and crisis reports, converting the radical demand for just peace into a postcolonial regime of dependence on technocratic tools, unaccountable experts, and external donors. Kosmatopoulos shows how master peace has been framing debates, designing interventions of peace and war, and defining the problem of violence in Lebanon and the Middle East for decades, to deleterious effect. As the supposed moral high ground that justifies external intervention and precludes political solutions or democratic forms of action, master peace has obscured the geopolitical and ideological nature of violence in the region, substituting democratic notions of peace

for an elitist antipolitics of expertise characterized by dependence, domination, and epistemic violence.

Building Peace Routledge

This book provides students, activists, community organizers and the general public with a concise and clear guide on how to approach, analyze and address conflict in order to transform relationships and work towards peace with justice. In doing so, it details a systematic process to analyze conflict, and offers an understandable framework in which to situate and choose strategies of building cultures of peace. It acknowledges the academic divide between the disciplines of peace studies and conflict resolution studies, yet is relevant to students of both fields. The volume draws on relevant theory and research from sociology, psychology, critical studies and anthropology, and starts from the assumption that conflict analysis and transformation must include a critical analysis of hegemony and power.

Water as a Catalyst for Peace Routledge

This book provides in-depth analysis of such third party methods as mediation, arbitration, hybrid procedures, problem solving workshops, and peacekeeping, uniquely bringing all major topics of third party intervention into one text. The last two chapters deal with timing of intervention and ripe moments, and ethics. Students of conflict resolution and peace studies will benefit from this book.

The 2nd edition of Encyclopedia of Violence, Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly-regarded 1st edition (1999), and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over, the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies, and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism and Political Assassinations, the Encyclopedia comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles. In his Preface to the 1st edition, Editor-in-Chief Lester Kurtz wrote: "The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace, and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena." Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set
Many brand-new articles alongside revised and updated content from the First Edition

International Conflict Resolution Psychology Press

This book outlines the generalist approach to conflict resolution. The approach was inspired by the generalist approach to social work but has now emerged in the fields of conflict resolution and peace studies. Essentially, the approach considers conflict resolution practice and scholarship very broadly. Generalist scholarship and practice are contrasted against specialized ways of conducting conflict resolution, whereby practitioners become well versed in one mode of practice or a specific theoretical orientation to scholarship. Several theories provide a foundation for this inclusive approach: conflict transformation, eco-systemic scholarship, the strengths perspective, and a new theory of social conflict, the theory of differences. The generalist approach is intended to provide a way for conflict resolution and peace studies scholar-practitioners to help diverse parties

address complex conflicts at various levels (personal to international). Generalist scholar-practitioners assist parties to comprehensively and holistically address these conflicts, in a multi-layered, multi-level fashion, but they must be comfortable with ambiguity, monitor intervention complexity, and give parties control over how their conflicts are addressed. Ultimately, this may make parties more committed to their conflict interventions and outcomes.

Communicating with Dignity and Curiosity Ohio University Press
This book explores how creative ways of resolving social conflicts emerge, evolve, and subsequently come to be accepted or rejected in inter-group relations. Creativity and Conflict Resolution explores a subject with which political communities involved in social conflict have always grappled: creative ways of imagining and actualizing visions of conflict resolution. This is an ambitious question, which concerns human communities at many different levels, from families, regional-independence movements, and national governments, to inter-state alliances. The author argues that unconventional viability lies at the heart of creativity for transcending seemingly intractable inter-communal conflicts. More specifically, conflict resolution creativity is a social and epistemological process, whereby actors involved in a given

social conflict learn to formulate an unconventional resolution option or procedure. Demystifying the origin of unthinkable breakthroughs for conflict resolution and illuminating theories of creativity based on 17 international case studies, this book will be of much interest to students of conflict resolution, peace and conflict studies, human security and IR. Tatsushi Arai is an Associate Professor of Peace and Conflict Transformation at the SIT Graduate Institute in Vermont, USA. He has a PhD in Conflict Resolution from George Mason University, Washington DC, and extensive practical experience in the field.

The Master's Peace Rowman & Littlefield
Examining international water allocation policies in different parts of the world, this book suggests that they can be used as a platform to induce cooperation over larger political issues, ultimately settling conflicts. The main premise is that water can and should be used as a catalyst for peace and cooperation rather than conflict. Evidence is provided to support this claim through detailed case studies from the Middle East and the Lesotho Highlands in Africa. These international cases – including bilateral water treaties and their development and formation process and aftermath – are analyzed to draw conclusions about the outcomes as well as the processes by which these outcomes are achieved. It is demonstrated that the perception of a particular treaty as being equitable and fair is mainly shaped by the negotiation process used to reach certain outcomes, rather than being determined mechanistically by the quantitative allocation of water to each party. The processes and perceptions leading to international water conflict resolutions are emphasized as key issues in advancing cooperation and robust implementation of international water treaties. The key messages of the book are therefore relevant to the geo-political and hydro-political aspects of water resources in the context of bilateral and multilateral conflicts, and the trans-boundary management of water resources, which contributes insights to political ecology, geo-politics, and environmental policy.

The Anatomy of Peace Burns & Oates
This book introduces Root Narrative Theory, a new approach for narrative analysis, decoding moral politics, and for building respect and understanding in conditions of radical disagreement. This theory of moral politics bridges emotion and reason, and, rather than relying on what people say, it helps both the analyst and the practitioner to focus on what people mean in a language that parties to the conflict understand. Based on a simple idea—the legacy effects of abuses of

power—the book argues that conflicts only endure and escalate where there is a clash of interpretations about the history of institutional power. Providing theoretically complex but easy-to-use tools, this book offers a completely new way to think about storytelling, the effects of abusive power on interpretation, the relationship between power and conceptions of justice, and the origins and substance of ultimate values. By locating the source of radical disagreement in story structures and political history rather than in biological or cognitive systems, Root Narrative Theory bridges the divides between reason and emotion, realism and idealism, without losing sight of the inescapable human element at work in the world's most devastating conflicts. This book will be of much interest to students of conflict resolution, peace studies and International Relations, as well as to practitioners of conflict resolution.

Conflict Resolution Routledge
In real-life conflict resolution situations, one size does not fit all. Just as a mechanic does not fix every car with the same tool, the conflict resolution practitioner cannot hope to resolve every dispute using the same technique. Practitioners need to be comfortable with a wide variety of tools to diagnose different problems, in vastly different circumstances, with different people, and resolve these conflicts effectively. The Conflict Resolution Toolbox gives you all the tools you need: eight different models for dealing with the many conflict situations you encounter in your practice. This book bridges the gap between theory and practice and goes beyond just one single model to present a complete toolbox - a range of models that can be used to analyze, diagnose, and resolve conflict in any situation. It shows mediators, negotiators, managers, and anyone needing to resolve conflict how to simply and effectively understand and assess the situations of conflict they face. And it goes a step further, offering specific, practical guidance on how to intervene to resolve the conflict successfully. Each model provides a different and potentially useful angle on the problem, and includes worksheets and a step-by-step process to guide the reader in applying the tools. Offers eight models to help you

understand the root causes of any conflict. Explains each model's focus, what kind of situations it can be useful in and, most importantly, what interventions are likely to help. Provides you with clear direction on what specific actions to choose to resolve a particular type of conflict effectively. Features a detailed case study throughout the book, to which each model is applied. Additional examples and case studies unique to each chapter give the reader a further chance to see the models in action. Includes practical tools and worksheets that you can use in working with these models in your practice. The Conflict Resolution Toolbox equips any practitioner to resolve a wide range of conflicts. Mediators, negotiators, lawyers, managers and supervisors, insurance adjusters, social workers, human resource and labour relations specialists, and others will have all the tools they need for successful conflict resolution.
