The Six Healing Sounds has a long history in China. Used as a self-cultivation tool, it is based on the principles of Chinese Medicine where sounds have a connection to the internal organs. The Chinese name is Liu Zi Jue, meaning, literally, "six characters knock or secrets." The real meaning behind them is to use the sound syllable to vibrate and massage the internal organs to maintain health, or to heal if one is sick. To the Chinese, to heal means to be in harmony or balance. In fact, that is the goal of all the Chinese healing arts - to bring one into balance. The Six Healing Sounds will strengthen what is deficient, and will sedate what is excess. Six Healing Sounds Made Simple is a bold step to introduce the art to the West in its authentic form. Although there are many schools of Six Healing Sounds that are taught here, most are focusing on making loud sounds with the throat alone, and do not address the intricacies and practice of a healing nature. Hendrik Santo has made a simplified method in which the practitioner can learn and practice and immediately benefit. It is used as a method of self-healing, and can be used by anyone. Six Healing Sounds in a nutshell, can be described as almost like humming to oneself with breathing, while in meditative seating, and mental state in Samadhi. To sum it up that simply, is an over-simplification, as it takes some time to cultivate those steps. In his teachings, Hendrik Santo pays close attention to the details of mental state, physical posture, relaxation, breathing, timing, sound, mouth formation, rhythm, and duration of the Six Healing Sounds. These are further supplemented with understanding the Chinese Medicine principles and concepts behind them.

This book is a Primer, an introduction of the quintessential basics. Something that a person who has not attended my seminars could read quickly, and immediately familiarize themselves with the core concepts, imaging, channel methods, have a few "go-to" points, and immediately apply the magic of Master Tung's Acupuncture in the clinic. It is not exhaustive in theory, details, or intricacies, but shows the power of the system to a TCM trained acupuncturist and immediately benefit by it. When I first started working with Master Tung's Acupuncture in acupuncture school, I read the available books of that time and wished there was a simple book to present the information. Since the average acupuncturist already is familiar with over 400 points, why scrap that and begin another system? But in the way I wrote this Primer, they can simply add to the information they have and then immediately apply this in the clinic. There are many books on Master Tung's Acupuncture, but often these books may be too much for the beginner and do not let the beginner grasp useful concepts or how to use Master Tung's Acupuncture. But don't underestimate the power of the content of this book. It will certainly transform your practice. The idea of this book is to give you a simple and elegant rationale for using the system., use the powerful 14 Channel acupuncture you are already familiar with, and make use of the Master Tung system immediately.

In this book, I use a lot of standard acupuncture points along with Master Tung's acupuncture and emphasize the use of channels and imaging for optimal clinical use. If a practitioner can use this work, they can have a turnkey approach in the clinic, simply by implementing these acupuncture and herbal protocols. The idea is for each disease, I have installed "cheat sheets" for the practitioner to immediately refer to and try to insert needles and prescribe herbs for. The fifth in the series of Master Tung's Acupuncture books, the idea is for someone to start with the Master Tung's Primer, The Best of Master Tung's Acupuncture, Master Tung's Acupuncture for Pain, and Master Tung's Acupuncture for Internal Medicine Disorders. With this manual, we will discuss the use of Master Tung's Acupuncture with herbals for even greater clinical success. The book is composed of monographs on each disease, best points to treat the problem, and high percentage success herbal prescriptions to give the patient as homework. Unique is that we only use a handful of both TCM and Master Tung points, and a small amount of herbal formulas for a turnkey approach to a clinic. This can be used as a roadmap for the new clinician, improve clinical success for the intermediate practitioner, or provide an alternative approach for the seasoned veteran.
