Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Economics of Crime Newnes
From his deathbed, Sir Bertram de Auxerre bequeaths all his worldly possessions to the young warrior Remy Valeur. Remy arrives to the lands of Auxerre determined to manage both the holdings and Sir Bertram's young daughter, Lisette. Lisette rebels against Remy's domineering ways until she grows into womanhood and suddenly finds her defiance changing to something surprisingly different. Remy battles his own growing desire for his beautiful charge and finds himself embroiled in a match of wills as he attempts to deny the passion that burns between them. Excerpt from Chapter 6 Remy willed himself awake. Drew a deep breath. The scent of violets, soft and floral, filled his senses and suddenly he was wide awake. He stared at the ceiling, trying to get his faculties to work. His arms were bound. He couldn't move, couldn't look beside him, but he knew. Lisette was there. She had come to his bed. He felt her small warm body curled next to his and her long hair splayed back across his chest, tickling his bare skin. He drew a deep breath. The girl had not only come to his cottage, but had come to his bed? Impossible! Lisette loved nothing better than to provoke him, but this was too much. She was playing a very dangerous game with him. His body, already heated from the dream he'd had of her, hardened. He groaned and she shifted beside him, sighing softly. "Lisette!" he snarled. "What the hell are you doing here?" He jerked against his binds, felt the rope press into his skin. He bellowed in rage. "Untie me!" Lisette bolted up. Her first frantic thoughts flew to the rope that bound him. He'd pulled it taut and it strained against the wooden post, the sound of wood splintering. She yelped and out a sense of self-preservation leapt onto him, straddled his torso as he swore again and thrashed beneath her. The bed post seemed to give and, frightened it would break, she lunged forward to hold his hands fast. Beneath her, his movements stopped abruptly. His breath warmed her breasts as he lay quietly beneath her. He moved slightly and she could feel the prickle of his short beard through her thin nightgown. A hot thrill of pleasure shot down her spine, desire pooled within her, shocking her. "Lisette," he whispered. "Remy...?" The absurdity of her situation slowly dawned upon her. If she let go of his hands, he would surely break the bed, but she could hardly remain with her breasts pushed against his face. "Get up." His voice sounded different to her. It was heavy and gruff. "Stop struggling against your binds. I need to speak to you." "Get. Up." "All right, but it's only with the understanding that you'll be reasonable."

Twelve Years a Slave Legare Street Press
The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Six years ago, Elizabeth Harewood and Lord Roland Penhallow were London's golden couple, young and beautiful and wildly in love. Forced apart by her scheming relatives and his clandestine career, Lilibet and Roland buried their passion beneath years of duty and self-denial, until a chance holiday encounter changes everything they ever knew about themselves...and each other. But Miss Elizabeth Harewood is now the Countess of Somerton, estranged wife of one of England's most brutal and depraved aristocrats, and she can't afford the slightest hint of scandal to her name. When Roland turns up mysteriously at the castle where she's hidden herself away, she struggles to act as a lady should, but the gallant lover of her youth has grown into an irresistibly dashing and dangerous man, and temptation is only a single kiss away...

Completely Inaccurate started out as a weekly improvisational sketchbook comic. Each week a few pages were drawn in a 6 by 9 sketchbook. Whatever came to mind. Completely improvised. What followed was a foray into historical fiction, end of the world prophecies, Pseudo-Discordianism, music trivia, Monarchism, 11th hour deadlines and general insanity. George is an average businessman trying to work his way up the corporate ladder. Suddenly, he finds his career crashing down before his eyes. Touched by insanity (.and the gods) George finds himself transformed into an Emperor-like figure and begins a quest to reclaim his throne halfway around the world ...in America.

Boatbuilding with Steel Lindhardt og Ringhof

Electricity from renewable sources of energy is plagued by fluctuations (due to variations in wind strength or the intensity of insolation) resulting in a lack of stability if the energy supplied from such sources is used in ‘real time’. An important solution to this problem is to store the energy electrochemically (in a secondary battery or in hydrogen and its derivatives) and to make use of it in a controlled fashion at some time after it has been initially gathered and stored. Electrochemical battery storage systems are the major technologies for decentralized storage systems and hydrogen is the only solution for long-term storage systems to provide energy during extended periods of low wind speeds or solar insolation. Future electricity grid design has to include storage systems as a major component for grid stability and for security of supply. The technology of systems designed to achieve this regulation of the supply of renewable energy, and a survey of the markets that they will serve, is the subject of this book. It includes economic aspects to guide the development of technology in the right direction. Provides state-of-the-art information on all of the storage systems together with an assessment of competing technologies Features detailed technical, economic and environmental impact information of different storage systems Contains information about the challenges that must be faced for batteries and hydrogen-storage to be used in conjunction with a fluctuating (renewable energy) power supply
