Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained

with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

12 Rules for Life Hippocrene Books

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming

tutorials are offered on the book's web site. *Arabic-English Bilingual Visual Dictionary* Routledge In an innovative approach to teaching Modern Standard Arabic, this new content-based book aims to bolster study for advanced high students in both linguistic skills and literary appreciation through the reading of a wide variety of original modern Arabic poetry by ten prominent writers: Abu al-Qasim al-Shabbi, Mahmoud Darwish, Abd al-Mu'ti Higazi, Said Aql, Fadwa Touqan, Elia Abu Madi, Salah Abdel Sabour, Adonis, Nizar Qabbani, and Ahmad Shawqi. The book aims at enabling students to read, enjoy, and appreciate Arabic poetry through a set of activities-pre-reading; reading; follow-up; and reading alone. These activities facilitate the student's grasp of the structural complexity, lack of conformity to standard grammatical rules, and unfamiliar cultural perspectives that are known to make reading poetry difficult in any language. Mastering Arabic through Literature, Volume 3: Poetry adopts an integrated skills approach that emphasizes all language skills in the effective articulation of ideas and meaningful communication. It also fosters the learning of vocabulary and idiomatic expressions and boosts learners' metaphoric use of the language. The book is divided into four units, each unit drawing on the works of the ten poets to explore and analyze a particular aspect of Arabic poetry. It begins with coverage of the literary theory on modern Arabic poetry. Unit 1 then outlines main topics and issues in modern Arabic poetry, using reading and analysis of excerpts from the works of the poets covered; Unit 2 focuses on imagery in modern Arabic poetry with samples for study from the works of the ten poets; Unit 3 focuses on music in Arabic poetry and how rhythm is used by different poets for different purposes; and Unit 4 focuses on poetic language and style in modern Arabic literature.
