This volume presents case studies of language learning beyond the classroom. The studies draw on a wide range of contexts, from North and South America to Europe and the Asia-Pacific region. Each provides principled links between theory, research and practice. While out-of-class learning will not replace the classroom, ultimately all successful learners take control of their own learning. This book shows how teachers can help learners bridge the gap between formal instruction and autonomous language learning. Although English is the primary focus of most chapters, there are studies on a range of other languages

including Spanish and Japanese.

HKDSE Paper 4 Oral English

This edited volume explores the multifaceted nature of teacher emotions, presenting current research from different approaches and perspectives, focused towards the second language classroom. Twenty three chapters by well-known scholars from the applied linguistics, TESOL and educational psychology fields provide the reader with a holistic picture of teacher emotions, making this collection a significant contribution to the field of second language teaching. Given the emotional nature of teaching, the book explores a number of key issues or dimensions of L2 teachers' emotions that were until now

rarely considered. The contributions present the views of a select group of applied linguistic researchers and L2 teacher educators from around the world. This international perspective makes the book essential reading for both L2 teachers and teacher educators.

Medicinal Chemistry of Anticancer Drugs, Second Edition, provides an updated treatment from the point of view of medicinal chemistry and drug design, focusing on the mechanism of action of antitumor drugs from the molecular level, and on the relationship between chemical structure and chemical and biochemical reactivity of

antitumor agents.

Antitumor chemotherapy is a very active field of research, and a huge amount of information on the topic is generated every year.

Cytotoxic chemotherapy is gradually being supplemented by a new generation of drugs that recognize specific targets on the surface or inside cancer cells, and resistance to antitumor drugs continues to be investigated. While these therapies are in their infancy, they hold promise of more effective therapies with fewer side effects.

Although many books are available that deal with clinical

aspects of cancer chemotherapy, this book provides a sorely needed update from the point of view of medicinal chemistry and drug design. Presents information in a clear and concise way using a large number of figures Historical background provides insights on how the process of drug discovery in the anticancer field has evolved Extensive references to primary literature

The main thesis of this book is that, given that South African education faces major challenges, the

BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers – thus far overlooked – a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. After an in-

depth, interpretive analysis of various language contact phenomena, it shows why it is such a tall order for Hongkongers to live up to the Special Administrative Region of government's language policy goalpost, 'biliteracy and trilingualism'. A detailed contrastive analysis between Cantonese and (a) English, (b) Modern Written Chinese, and (c) Putonghua helps explain the nature of the linguistic and acquisitional challenges involved. Economic forces and sociopolitical realities helped shape the 'mother tongue education' or 'dual MoI streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another MoI debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances

curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning experiences, recommendations are made to help redress that social inequity problem.

Seven Strategies of Assessment for Learning

Mathematician

The 10th anniversary edition of the iconic book that takes parents into the mysterious world of boys, with new foreword, introduction and tribute to the author. THE TENTH ANNIVERSARY EDITION OF A PARENTING CLASSIC

How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180 classes of boys. Her insights into what boys need - and what parents can do to help them - are ground-breaking. In this new edition of her honest, no-nonsense and best-

selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

This book will be of interest to a broad readership,

regardless of whether for teachers and they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources

for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed

unfavourably in relation to the L2 mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.
