Davis Advantage for Medical-Surgical

Nursing Elsevier Health Sciences
Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.
Child Health Nursing Coursepoint
An official publication of the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN), Perinatal Nursing, Fourth Edition presents up-to-date information based on the most rigorous evidence and offers suggestions for best practices. This new edition of the authoritative, comprehensive text used by perinatal nurses worldwide features a wealth of new content to keep practice current. New chapters related to patient safety and the development of a highly reliable perinatal unit, inform nurses how to conduct team training and drills for obstetric emergencies, create checklists, and effectively handoff patients. It features expanded coverage of high-risk pregnancy, from bleeding in pregnancy to preterm labor and birth, diabetes, cardiac disease, pulmonary complications, multiple gestation, and maternal-fetal transport. An all-new chapter on obesity in pregnancy covers risks to the mother and fetus, care from preconception to postpartum, as well as bariatric surgery. An expanded chapter on newborn nutrition includes new sections on the infant feeding decision, benefits of breastfeeding, nutritional components, and preterm milk and lactation.
