Maternal-Neonatal Nursing Made Incredibly Easy! F.A. Davis

Designed to be used by the student together with the sixth edition of Maternal and child health nursing by Adele Pillitteri.

Foundations of Maternal-Newborn and Women's Health Nursing - E-Book Lippincott Williams & Wilkins

It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children, not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

MCN, the American Journal of Maternal/child Nursing's Readings for Today's Maternal/child Nurse Elsevier Health Sciences

Build your skills in the science and art of maternity and pediatric nursing! Maternal-Child Nursing, 6th Edition makes it easy to understand the essentials of women's health, maternity, and children's nursing care. It simplifies the steps of the nursing process and relates them to care, helping you develop clinical judgment skills and provide safe, effective care in evidence-based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is important to remember when providing safe and optimal quality care. Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers for questions that are likely to be asked or topics that need to be taught. Communication Cues offer practical tips for verbal and nonverbal communication with patients and families. Glossary at the end of the book gives students quick access to all key terms and definitions. NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications.

MCN, American Journal of Maternal Child Nursing Elsevier Health Sciences

Get the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX-RN® examination.

Written by the foremost experts in maternity and pediatric nursing, the user-friendly Maternal Child Nursing Care, 6th Edition provides both instructors and students with just the right amount of maternity and pediatric content. This new edition includes updated case studies within Nursing Care Plans, as well as a new chapter on pediatric cancer. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Critical thinking case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings.

Nursing Care Plans include rationales for interventions and provide you with an overview and specific guidelines for delivering effective nursing care. Nursing Alerts highlight critical information that you need to know when treating patients. Guidelines boxes outline nursing procedures in an easy-to-follow format. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes in the maternity unit highlight important information nurses need to communicate to patients and families. Cultural Competence boxes equip you with the knowledge you need to deliver culturally competent care. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care. Medication Guides serve as an important reference of drugs and their interactions.

Clinical Pocket Companion for Maternal-Child Nursing Care Lippincott Williams & Wilkins

Provide competent and sensitive maternal and newborn nursing care with Clinical Companion for Maternity & Newborn Nursing, 2nd Edition! Ideal for quick reference in the clinical setting, this book offers the information you need on topics such as pregnancy, childbirth, postpartum care, and care of the newborn, including potential complications for each. Expert authors Dr. Shannon E. Perry, Kitty Cashion, Dr. Deitra Leonard Lowdermilk, and Kathryn R. Alden stress the importance of safe nursing practice as outlined in the Quality and Safety Education for Nurses (QSEN) initiative. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be

used for quick reference in critical situations. Nursing Alerts highlight critical information that must be considered when providing care. Medication Guides in an appendix provide a key reference for common drugs and their interactions. Updated content provides the most current practice guidelines, including expanded information on obesity, the late preterm infant, and fetal heart rate pattern identification. Safety Alerts highlight developing competencies related to safe nursing practice in conjunction with the QSEN initiative on quality and safety in nursing care.

Core Curriculum for Maternal-newborn Nursing World Bank Publications

his brand new book gives your students a holistic approach to pediatric care that views wellness and illness as family-centered events. Accessible and reader friendly, the book underscores the importance of child development in the planning of nursing care; encourages child health promotion as a foundation for healthy adult living; and examines both the physical and emotional effects of illness on children. The book's emphasis on nursing communication, family education, and culturally sensitive care combines with nursing process overviews, an outcomes orientated approach, critical thinking exercises, and step by step coverage of therapeutic procedures to produce the most effective and practical resource in the field

Proceedings of the Ninth Maternal-Child Nursing Conference F.A. Davis

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

The Critical Components of Nursing Care Lippincott Williams & Wilkins

This new book will be a core text for undergraduate Maternity/Newborn courses. It also will work for courses emphasizing Women's Health across the lifespan. Coverage includes core content on preconception, pregnancy, labor, birth, and postpartum. In addition, the text focuses on important topics throughout a woman's life: health promotion, nutrition, medical issues, psychosocial issues, sexuality, family, fertility control and issues, menopause, and aging. While other texts touch on the different stages of a woman's lifespan, this book provides more detail and information in areas outside the average maternity text.

Elsevier Health Sciences

From prenatal through postpartum care, Gloria Leifer's Maternity Nursing: An Introductory Text provides an essential foundation for promoting the health and wellness of mothers and newborns. This edition includes the latest advances and practice standards in maternity nursing care, highlighting Healthy People 2020 and the 2011 Joint Commission National Patient Safety Goals. Part of the popular LPN Threads series, this text addresses the knowledge, skills, and scope of practice appropriate for LPN/LVN and LPN/LVN-to-ADN ladder programs. Chronological organization of content follows a sequence from family issues, fetal development, pregnancy, labor, birth, and care of the newborn, to postpartum issues with special social, familial, and cultural considerations. Organization of concepts in each chapter by simple to complex and from health to illness makes it easier to locate and understand the material. Complete, concise coverage includes a table of physiologic and psychosocial changes throughout the pregnancy, unique content on CPR for the pregnant patient and infectious diseases acquired during pregnancy, a pictorial story of a vaginal birth, cultural considerations of pregnancy and maternal care, and nursing responses to loss, death, and grief. UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with multiple-choice, fill-in-the-blank, scenario-based clinical situation questions, and online activities. Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. Health Promotion boxes and content focus on family-centered care, health promotion, illness prevention, and women's health issues. Clinical Pathways use an interdisciplinary, collaborative-care approach in tracking interventions along a timeline from assessment to discharge and follow up. Online resources for further research and study are included at the end of each chapter. UNIQUE! LPN Threads make learning easier, featuring a 10th-grade reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design.

Maternity, Newborn, and Women's Health Nursing Elsevier Health Sciences

This 21st volume of the Annual Review synthesizes nursing research to date on child health and illness, including family issues. Ages range from pre-term babies to adolescents, with a focus on chronic illness. A special final chapter reviews the highlights of the past 10 volumes of the Annual Review of Nursing Research, to mark the 20th anniversary of the Review.

Proceedings of the Ninth Maternal-Child Nursing Conference Lippincott Williams & Wilkins

This book provides step-by-step instruction in assessments and interventions so beginning level users can function quickly in the clinical area. The book carefully integrates the importance of understanding family, culture, client teaching, communication, and critical thinking all into the overall continuum of nursing care. The third edition includes alternative and complementary therapies and evidence-based practice to focus on today's nursing practice. Includes the most current trends that affect maternity nursing practice today Complementary therapies and evidence-based practice are presented throughout (Includes a FREE CD-ROM and SIMON website at: www.harcourthealth.com/SIMON/Murray/foundations/)

AWHONN's Perinatal Nursing Lippincott Williams & Wilkins

Ideal for accelerated maternity and pediatrics courses, *Maternal-Child Nursing, 4th Edition* is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together. Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

Maternal Newborn Nursing Care Plans Lippincott Williams & Wilkins

Growing research shows that many children from immigrant and refugee families are not doing well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.

Focus on Specific Nursing Interventions F.A. Davis

With easy-to-read coverage of nursing care for women and newborns, *Foundations of Maternal-Newborn & Women's Health Nursing, 6th Edition* shows how to provide safe, competent care in the clinical setting. Evidence-based guidelines and step-by-step instructions for assessments and interventions help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, client teaching, and clinical decision making. Written by specialists in maternity nursing, Sharon Smith Murray and Emily Slone McKinney, this text reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare you for the NCLEX® exam! Nursing Care Plans help you apply the nursing process to clinical situations. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing to respond when encountering communication blocks. Communication Cues offer tips for interpreting patients' and families' verbal and nonverbal communication. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Updated drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Check Your Reading helps you assess your mastery of key content. Critical to Remember boxes highlight and summarize need-to-know information. Want to Know boxes provide guidelines for successful client education. Glossary provides definitions of all key terms. NEW! Safety Alerts help you develop competencies related to QSEN and safe nursing practice. NEW! Unfolding case studies help you apply what you've learned to practice. UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. UPDATED content includes the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, and the QSEN competencies.
