Maternal Child Nursing Care in Canada - E-Book Lippincott Williams & Wilkins

The Maternity and Pediatric Nursing book by Ricci, Kyle and Carman is a very informative book that includes comprehensive and straightforward concepts on the health of women and children. All 53 chapters of the book tackles the normal expectations in pregnancy and n the growth and development of children. It also discusses challenges faced during pregnancy untilthe post-partum period as well as health issues of children from the womb to adolescence. Every chapter of the book provides a strong knowledge base that will immensely help soon-to-be nurses pass critical exams. For student nurses and those who are preparing to take NCLEX, to study a 2000-page book is surely a daunting task, especially if this book comprises only a small part of a study plan. The amount of information therein is massive, and memorizing facts and critical thinking through the application of concepts would be a big challenge, and overcoming this challenge is pertinent to the success of taking nursing exams, especially the NCLEX. The review questions that come after every chapter effectively test the student's application ability. However it is unlikely for the nursing instructors and Nursing boards to use the same questions to test the ability of the students. With the massive amount of information provided on the text book, how would a student nurse determine which concepts to focus on? The test bank we offer is streamlined to include important concepts to review, which would help you gain control of your study plan by providing you concepts which nursing instructors and board examiners are likely to include in the examinations. The test questions are carefully developed according to NCSBN's guidelines on question development. How effective is this test bank in providing the help you need? The effectiveness and quality of this test bank is ensured because those who contributed to the making of the questions and rationales are nurse educators themselves who are experts in their fields. If you want to enhance your knowledge, application and critical thinking skills further, and if you want to pass your exams, especially the NCLEX, this test bank is the best option for you!

See what instructors are saying... "The content is really geared for the LPN/LVN student. The layout of the text highlights many different areas. Safe Maternity and Pediatric Nursing Care helps to prioritize content for the student as well as helps to focus their learning. This text is well organized!" - Jan Didich, RN, BSN, MA, Assistant Professor at Clark State Community College "The organization of the material and the writing format in Safe Maternity and Pediatric Nursing Care make it easy to follow and understand. There are sufficient review questions at the end of each chapter to cover a good portion of the material. Also, there is a large variety of review exercises in the study guide that positively assist in the learning and retention process." - Valerie Jenkins BSN, RN Instructor at Galen College of Nursing "Therapeutic Communication is one of the most difficult areas for the PN student due to short amount of time in school and saturation of

content. Safe Maternity and Pediatric Nursing Care does superior job with communication!" - Darla K. Shar MSN, RN Associate Director Hannah E. Mullins School of Practical Nursing "Glad we have a better book for student success!" - Shannon Dahms, DNP, RNC Nursing Faculty at Minnesota State Community and Technical College "Resources makes this book a winner. The therapeutic communication examples are a real plus and focus in our nursing program. I like the capstones: safety, promotion, expanded concepts, teamwork. Linnard-Palmer is more concise and in line with the LPN education goals." - Mary Davis, R.N., MSN, Practical Nursing Instructor at Wiregrass Georgia Technical College "Love the real-world case studies for the introduction! What a great way to introduce the typical patient and start discussion!" - Shannon Dahms, DNP, RNC Nursing Faculty at Minnesota State Community and Technical College
