The true story of a London schoolteacher, who, tired of the rat race and brooding over a failed relationship, uproots and volunteers to teach in rural Africa for two years. Sent to the Republic of Zambia with a remit to teach maths, HIV and Gender awareness, he finds eager pupils struggling in a tough environment. In between battling snakes, stomach bugs and death-defying bus journeys, Mark finds both hope in unusual places, and corruption where he least expects. This memoir is both a recollection of his more vivid memories of eastern province, and his reflections on problems in Zambia and their possible causes. It is also a useful study of the physical and psychological challenges that a volunteer may face in Africa.

Zambia

"A large literature examines the link between shocks to households and the educational attainment of children. The authors use new data to estimate the impact of shocks to teachers on student learning in mathematics and English. Using absenteeism in the 30 days preceding the survey as a measure of these shocks they find large impacts: A 5 percent increase in the teacher's absence rate reduces learning by 4 to 8 percent of average gains over the year. This reduction in learning achievement likely reflects both the direct effect of increased absenteeism and the indirect effects of less lesson preparation and lower teaching quality when in class. The authors document that health problems-primarily teachers' own illness and the illnesses of their family members-account for more than 60 percent of teacher absences; not surprising in a country struggling with an HIV/AIDS epidemic. The relationship between shocks to teachers and student learning suggests that households are unable to substitute adequately for teaching inputs. Excess teaching capacity that allows for the greater use of substitute teachers could lead to larger gains in student learning."--World Bank web site.

With innovative new chapters on process tracing, regression analysis, and natural experiments, the second edition of Rethinking Social Inquiry further extends the reach of this path-breaking book. The original debate with King, Keohane, and Verba now updated remains central to the volume, and the new material illuminates evolving discussions of essential methodological tools. Thus, process tracing is often invoked as fundamental to qualitative analysis, but is rarely applied with precision. Pitfalls of regression analysis are sometimes noted, but often are inadequately examined. And the complex assumptions and trade-offs of natural experiments are poorly understood. The second edition extends the methodological horizon through exploring these critical tools. A distinctive feature of this edition is the online placement of four chapters from the prior edition, all focused on the dialogue with King, Keohane, and Verba. Also posted online are exercises for teaching process tracing and understanding process tracing.

Each question carries one mark. The test consists of negative marking and for every wrong answer, 1/3 mark shall be deducted. Negative Marking – 1/3 Conducting Body- Railway Recruitment Board (RRB)

Perspectives on Youth, HIV/AIDS and Indigenous Knowledges Springer Nature

Master's Thesis from the year 2020 in the subject Pedagogy - School Pedagogics, University of Zambia (Postgraduate studies), course: Master of Mathematics Education, language: English, abstract: The study explored teachers' classroom practices in addressing learners' errors regarding how they engaged grade eight learners in reading; how they probed learners' understanding; and what they did to enhance learners' process skills and encoding abilities in algebraic word problems. Five teachers and twenty five learners (in five focus groups discussions of five members each), at three secondary schools in Isoka district of Muchinga province, Zambia were purposively sampled to participate in the study. The study used a qualitative approach which followed a descriptive case study design. Data collection was done using lesson observations, semi-structured interviews, document analysis and focus group discussions. To capture observations and interviews in totality, video and audio recordings were used respectively. Thematic analysis was used to analyse data. The five performance strategies of solving word problems by Newman namely; reading ability, comprehension ability, transformation ability, process skills and encoding ability guided the analysis of data. The study was guided by the following research questions: How do teachers engage learners in reading algebraic word problems? How do teachers probe learners' understanding of algebraic word problems? What do teachers do to enhance learners' process skills and encoding abilities in algebraic word problems?
