This method of guided-discovery was created by Chapman (2011) as a way to flexibly implement inquiry-based learning in mathematics. It takes the form of a jigsaw puzzle and includes all

components of a standard inquiry cycle, but is not linear and can be pulled apart and reorganized in a variety of ways with missing parts.

How to Use a Guided Discovery Approach in Teaching Primary Mathematics. The guided discovery approach is one that is fundamentally linked with the constructivist school of education theory. If you do not want to introduce a brand new methodology to your classroom, you can incorporate elements of the

guided discovery approach to your teaching, allowing children to find the answers themselves.

Simply put, you can use a discovery plan to uncover evidence and facts that will prove the existence of a particular phenomenon. This method can also help you determine the real problem or

issue of an
organization,
making it a vital
instrument in
various fields of
research, such as
market research.
