This allows children to gradually build their way up to more and more intense work. The repetition gives children an opportunity to reinforce basic skills and concepts. Beat the clock for fast-paced math practice!

First-grade Math Minutes Teacher Created Resources
Ten years from now, what do you want or expect your students to remember from your course? We realized that in ten years what matters will be how students approach a problem using the tools they carry with them—common sense and common knowledge—not the particular mathematics we chose for the curriculum. Using our text, students work regularly with real data in moderately complex everyday contexts, using mathematics as a tool and common sense as a guide. The focus is on problems suggested by the news of the day and topics that matter to students, like inflation, credit card debt, and loans. We use search engines, calculators, and spreadsheet programs as tools to reduce drudgery, explore patterns, and get information. Technology is an integral part of today's world—this text helps students use it thoughtfully and wisely. This second edition contains revised chapters and additional sections, updated examples and exercises, and complete rewrites of critical material based on feedback from students and teachers who have used this text. Our focus remains the same: to help students to think carefully—and critically—about numerical information in everyday contexts.

Math Minutes, 6th Grade, eBook Carson-Dellosa Publishing
Helps to build basic arithmetic skills, increase speed, and improve problem-solving skills with one hundred ready-to-reproduce pages that are composed of ten problems ranging in difficulty.

Helps to build basic arithmetic skills, increase speed, and improve problem-solving skills with one hundred ready-to-reproduce pages that are composed of ten problems ranging in difficulty.

Math in a Minute, Grade K Creative Teaching Press
SAT MATH TEST BOOK

Humble Math - 100 Days of Timed Tests Math Minutes, 7th Grade, eBook
In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-geniuses everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among Grit’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

Math in a Minute, Grade 2 Frank Schaffer Publications
Using standardized testing formats, math skills are kept sharp with focused practice in computation, word problems, graphing, measurement and numbers. Includes scope and sequence charts and answer keys.
The Mad Minute Creative Teaching Press

In this workbook, we will ask the student to practice math little by little to boost student's confidence and lay good foundation. The student will be re-collecting the underlying concepts in order to solve any problem in this workbook. In addition, it will help the student to prepare for the quizzes, tests and exams.
