These conference proceedings focus on “Assessment for Learning: Within and Beyond the Classroom” in recognition of the power of assessment for

learning as a way of boosting student performance. They explore the breadth, depth and quality of the best models and practices, strategies, lessons learnt and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment such as graduate capability assessment in view of the need for educational institutions to evidence graduate employability.

In this book the Vedic
techniques are applied to
ordinary school mathematics
for eleven and twelve years-
old. the arithmetic
introduced in books I and II
is extended. The book also
deals with the initial stages of
solving equations, coordinate
geometry, approximations,
indices, parallels, triangles,
ratio and proportion as well
as other topics. Once a basic
grounding has been
established with the Vedic
methods the next stage is the
beginning of discrimination.
A problem is set and, armed
with several techniques, the
student must choose the
easiest or most relevant for
achieving the solution. This

book deals with some of the steps required for this training.
