The system ranks as a ‘stunning success’ according to standards of the Organisation for Economic Co-operation and Development (OECD). Shanghai also stands out for having the world’s highest percentage of	‘resilient students’ – students from socio-economically disadvantaged backgrounds who emerge as top performers. Learning From Shanghai: Lessons on Educational Success offers a close-up view of the people and the policies that have achieved such world-class performance. Based on research and personal observation gathered during the author’s recent field work with school principals, teachers and students, this book explores the

11 (Set of 4 Books)  
Hindi Core, Physics,  
Chemistry,  
Mathematics (For  
2022 Exam) Oswaal  
Books and Learning  
Private Limited

This book provides  
readers with an  
overview of recent  
international research

and developments in  
the teaching and  
learning of modelling  
and applications from  
a variety of theoretical  
and practical  
perspectives. There is a  
strong focus on  
pedagogical issues for  
teaching and learning  
of modelling as well as  
research into teaching  
and practice. The  
teaching of  
applications of  
mathematics and  
mathematical  
modelling from the  
early years through  
primary and secondary  
school and at tertiary  
level is rising in  
prominence in many  
parts of the world  
commensurate with an  
ever-increasing usage  
of mathematics in  
business, the  
environment, industry  
and everyday life. The  
authors are all  
members of the  
International

Community of  
Teachers of  
Mathematical  
Modelling and  
Applications and  
important researchers  
in mathematics  
education and  
mathematics. The  
book will be of interest  
to teachers,  
practitioners and  
researchers in  
universities,  
polytechnics, teacher  
education, curriculum  
and policy.

Social science

researchers have

become increasing  
attentive to the role  
of numbers in  
contemporary life.

Issues around big  
data, national test  
results, and output  
and performance  
statistics are now  
routinely reported  
and debated in the  
media. Numbers are  
a powerful resource  
for governments as a  
means to manage  
and ‘ improve ’  
their populations,  
and we are  
increasingly  
represented,  
organized and driven  
by an economy of  
numbers, which  
inserts itself into  
more and more  
aspects of our lives.  
This book critically  
addresses some of the  
ways in which  
numbers are

---

deployed in educational governance and practice, and some of the consequences of this deployment for what it means to be educated, to teach, and to learn.

Recognising that numbers do not simply represent, but that they change things and have real effects, allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side-stepped in the push to 'improve our numbers'. This collection offers a set of starting points from which we might speak back to numbers, drawing on research to explore

how numbers change the way we think about ourselves and what we do. This book was originally published as a special issue of the Journal of Education Policy.
