#### Mathematics in Action Jump Math

This text is based on standards in the AMATYC Crossroads document. The first in a three-book series, this text presents mathematical concepts and skills through relevant activities derived from real-life situations. These activities are meaningful because they illustrate how mathematics arises naturally from real-world situations and problems. Prealgebra Problem Solving is based on the assumption that you learn mathematics best by deriving concepts themselves in a meaningful context. Therefore, the text takes a collaborative approach to learning. Take an active role in your own learning by working in groups, thereby developing communication skills, a sense of independence, and a "can-do" attitude about mathematics. Technology is integrated throughout the book as appropriate so that you learn to interpret real-life data numerically and symbolically. Though the book is driven by the activities, there is a significant amount of practice of skill-based content through the many "Skills Checks," "What Have I Learned?" and "How Can I Practice?" exercises.

#### Common Core Math Workbook Nelson Thornes

Jump math was founded in the belief that all children, even those who have traditionally struggled at school, can learn mathematics. The JUMP Math student assessment & practice books are meant to be used in conjunction with the extensive teacher resources to enable students to practice and explore subtle variations on the lessons and to enable teachers to rapidly assess progress. For each lesson, there is a clear and highly effective lesson plan, which enables teachers to accomplish the seemingly impossible task of teaching to the whole class while tailoring to individual needs. Each lesson is carefully designed to generate deep, subtle, transferable mastery of key concepts. Lesson plans

include ideas for contextualizing the math, questions and tasks that allow students to discover mathematical concepts, games, activities, and innovative extension questions that keep "fast" students engaged and learning while teachers help others to master the key objectives.
