Mathematics Of Finance 7th Edition **Mathematics of Finance - Wiley Online Library** 200 CHAPTER 5 Mathematics of Finance A deposit of dollars today at a rate of interest  $P$  for years produces interest of  $t$   $r I = Prt$ . The interest, added to the original principal  $P$ , gives  $P + Prt = P(1 + rt)$ . This amount is called the future value

of  $P$  dollars at an interest rate  $r$  for time  $t$  in years. When loans are involved, the future value is often called the maturity value of the loan.
