- Objective

Questions based on new typologies introduced by the board- I. Stand- Alone MCQs, II. MCQs based on Assertion-Reason III. Case-based MCQs.

- Subjective Questions includes-Very Short, Short & Long Answer Types Questions
- Revision Notes for in-depth study
- Modified & Empowered Mind Maps & Mnemonics for quick learning
- Practice Papers for better understanding of Exam Pattern
- Chapter wise Learning Outcomes & Art integration as per NEP
- Include Questions from CBSE official Question Bank released in April 2021
- Unit wise Self -Assessment Tests & Practice Papers
- Concept videos for blended learning (science & maths only)

50 Math Problems With Solution Avichal Publishing Company

From the Preface: (...) The book is

addressed to students on various levels, to mathematicians, scientists, engineers. It does not pretend to make the subject easy by glossing over difficulties, but rather tries to help the genuinely interested reader by throwing light on the interconnections and purposes of the whole. Instead of obstructing the access to the wealth of facts by lengthy discussions of a fundamental nature we have sometimes postponed such discussions to appendices in the various chapters. Numerous examples and problems are given at the end of various chapters. Some are challenging, some are even difficult; most of them supplement the material in the text.

Containing a Systematic Statement of a New Mathematical Method; of Which the Principles Were Communicated in 1843 to the Royal Irish Academy; and Which Has Since Formed the Subject of Successive Courses of

Lectures, Delivered in 1 S.
Chand Publishing

Discussing 50 geometry problems with detailed solutions

NCERT Mathematics Solutions of class 12

Oswaal Books and Learning Private Limited

An authorised reissue of the long out of print classic textbook, *Advanced Calculus* by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades.

This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear

algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention *Differential and Integral Calculus* by R Courant, *Calculus* by T Apostol, *Calculus* by M Spivak, and *Pure Mathematics* by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

Oswaal NCERT Problems Solutions Textbook-Exemplar Class 12 (4 Book Sets) Physics, Chemistry, Mathematics, Biology (For Exam 2022) Arihant Publications India limited

1. Chapter-wise presentation for systematic and methodical study
2. Strictly based on the latest CBSE Curriculum and National Curriculum Framework.
