This fifth volume in the series of yearbooks by the Association of Mathematics Educators in Singapore entitled Nurturing Reflective Learners in Mathematics is unique in that it focuses on a single theme in mathematics education. The objective is to encourage teachers and researchers to advance reflection among students and teachers in mathematics classrooms. Several renowned international and Singapore researchers in the field have published their work in this volume. The fifteen chapters of the book illustrate evidence-based practices that school teachers and researchers can experiment with in their own classrooms to bring about meaningful learning outcomes. Three broad themes, namely fundamentals, instructional tools, and approaches to teaching for nurturing reflective learners in mathematics classrooms, shape the ideas in these chapters. The book makes a significant contribution towards the learning of mathematics. It is a good resource for mathematics teachers, educators and research students.

Design and Technology has long held a controversial place on the school curriculum, with some arguing that it shouldn't be there at all. This book presents and questions considered arguments and judgements, and explores the major issues that all D&T teachers encounter in their daily professional lives. In exploring some of the key debates, it encourages critical reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice, and link research and evidence to what they have observed in schools. Written by expert design and technology education professionals, chapters tackle established and contemporary issues, enabling you to reach informed judgements and argue your point of view with deeper theoretical knowledge and understanding. Debates covered include: What is the purpose of design and technology? Is it a vocational or

academic subject? What is the place of design and technology within the STEM agenda? What knowledge and skills do teachers really need? What does the design and technology gender divide mean for schools and pupils? Is it a 'creative' subject? What is the future for design and technology? With its combination of expert opinion and fresh insight, Debates in Design and Technology Education is the ideal companion for any student or practising teacher engaged in initial training, continuing professional development or Masters level study.

Primary Mathematics: Integrating Theory with Practice is a comprehensive introduction to teaching mathematics in Australian primary schools. Closely aligned with the Australian Curriculum, it provides a thorough understanding of measurement, geometry, patterns and algebra, data and statistics, and chance and probability. The fourth edition provides support for educators in key aspects of teaching: planning, assessment, digital technologies, diversity in the classroom and integrating mathematics content with other learning areas. It also features a new chapter on the role of education support in the mathematics classroom. Each chapter has been thoroughly revised and is complemented by classroom snapshots demonstrating practical application of theories, activities to further understanding and reflection questions to guide learning. New in this edition are 'Concepts to consider', which provide a guided explanation and further discussion of key concepts to support pre- and in-service teachers' learning and teaching of the fundamentals of mathematics.
