*Mathematical Studies Standard Level for the IB Diploma Coursebook*  
Cambridge University Press

This book addresses the questions why citizenship education is an important subject for students in further and adult

education and why we need democratic colleges to support the study of citizenship education. It investigates the historical roots of further and adult education and identifies how the adoption of citizenship education in the post-compulsory sector can enrich vocational studies in further education and programmes in adult education. It is argued that democratic colleges are vital to ensure that citizenship education informs the decision-making process throughout educational institutions (and as a means of establishing fair and equal representation for important stakeholders). The author has worked in both sectors for over a decade, and

uses this experience to offer a blend of educational practice and philosophical investigation. The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education.?

*General Studies Paper Ii* Crimson Publishing

More and more, teachers in the lifelong learning sector are required to teach the 14-19 age group. This book is a practical guide to delivering learning to 14-19s. It begins by looking at the background to teaching 14-19 in FE and covers current pathways for achievement. Coverage of effective delivery of the new Diploma qualification is included, giving guidance on planning and assessment. It goes on to explore the challenges of behaviour, participation and re-engaging disaffected learners. Finally, it considers the wider context of building partnerships with schools and the needs of industry and employers.
