More and more, teachers in the lifelong learning sector are required to teach the 14-19 age group. This book is a practical guide to delivering learning to 14-19s. It begins by looking at the background to teaching 14-19 in FE and covers current pathways for achievement. Coverage of effective delivery of the new Diploma qualification is included, giving guidance on planning and assessment. It goes on to explore the challenges of behaviour, participation and re-engaging disaffected learners. Finally, it considers the wider context of building partnerships with schools and the needs of industry and employers.

Indianapolis Monthly Cambridge University Press

This White Paper details the Government's 10-year reform programme for secondary and post-secondary education for 14-19 year olds, and sets out its response to the recommendations of the Tomlinson report (Working Group on 14-19 Reform final report available at www.14-19reform.gov.uk) published in October 2004. Proposals include: i) retention of GCSEs and A levels as the cornerstones of the education system (rather than adopting a universal baccalaureate-style qualification), but making improvements such as ensuring it is impossible to get a GCSE grade C or above without functional numeracy and literacy skills, promoting science GCSEs, allowing the most able A level students to take HE modules in the sixth form, and reducing the assessment burden at A level; ii) introducing new specialised Diplomas, covering both academic and vocational subjects as well as work experience, at three levels equivalent to foundation, GCSE and advanced level. The first four Diplomas will be available by 2008 for information and communication technology (ICT), engineering, health and social care, creative and media subjects; iii) developing a pilot programme for 14-16 year olds by 2007-08, based on the post-16 Entry to Employment programme, which will give pupils intensive personal guidance and support, involve significant work-based learning, lead to a level 1 Diploma with a range of further options including apprenticeships; iv) other proposals including introducing models of moderated teacher assessment in compulsory subjects to help raise standards across the curriculum; and introducing a 'pupil profile' for all 14 year old to record their cross-curricula achievements.

BREAKDOWN OF MATHEMATICS STANDARD LEVEL FOR THE IB DIPLOMA Cambridge University Press

This book addresses the questions why citizenship education is an important subject for students in further and adult education and why we need democratic colleges to support the study of citizenship education. It investigates the historical roots of further and adult education and identifies how the adoption of citizenship education in the post-compulsory sector can enrich vocational studies in further education and programmes in adult education. It is argued that democratic colleges are vital to ensure that citizenship

education informs the decision-making process throughout educational institutions (and as a means of establishing fair and equal representation for important stakeholders). The author has worked in both sectors for over a decade, and uses this experience to offer a blend of educational practice and philosophical investigation. The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education.
